Education technology checklist

- simple to install and use
- easily adaptable and flexible to class needs
- supports varied learning and teaching styles
- durable for classroom use
- environmentally sustainable

TECHNOLOGY FOR MULTIPLE PEDAGOGIES

Our ongoing research in schools, colleges and universities reveals many classroom challenges with technology: difficult installation and use, software compatibility issues and hardware that demands more of the user than it delivers.

Most important, technology products often fail a critical test: do they support varied teaching styles and the different ways people learn?

As instructors embrace active learning, they need interactive technologies that seamlessly integrate into curricula and classrooms. They should not only support lecture, but encourage student participation in every learning mode.

IM#: 13-0004039 | SM: ĒNO INTERACTIVE WHITEBOARD WITH ULTRA-SHORT THROW PROJECTOR

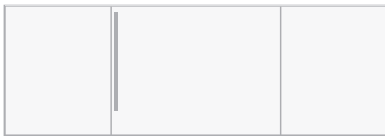

high standards, multiple options

ēno provides powerful interactivity with an easy-to-use interface, making it a natural part of the learning process.

ēno adapts to any classroom, instructor and student, with multiple configurations to fit any learning space. Capture and distribute lesson notes, create collaborative lessons for multiple users and project important content for discussions.

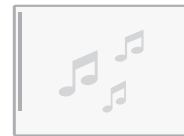

ēno classic the original wall mounted ēno interactive whiteboard

ēno flex combines dry erase surfaces on each side of the interactive whiteboard for maximum space utilization

ēno click magnetically mounted interactive whiteboard installs in an instant

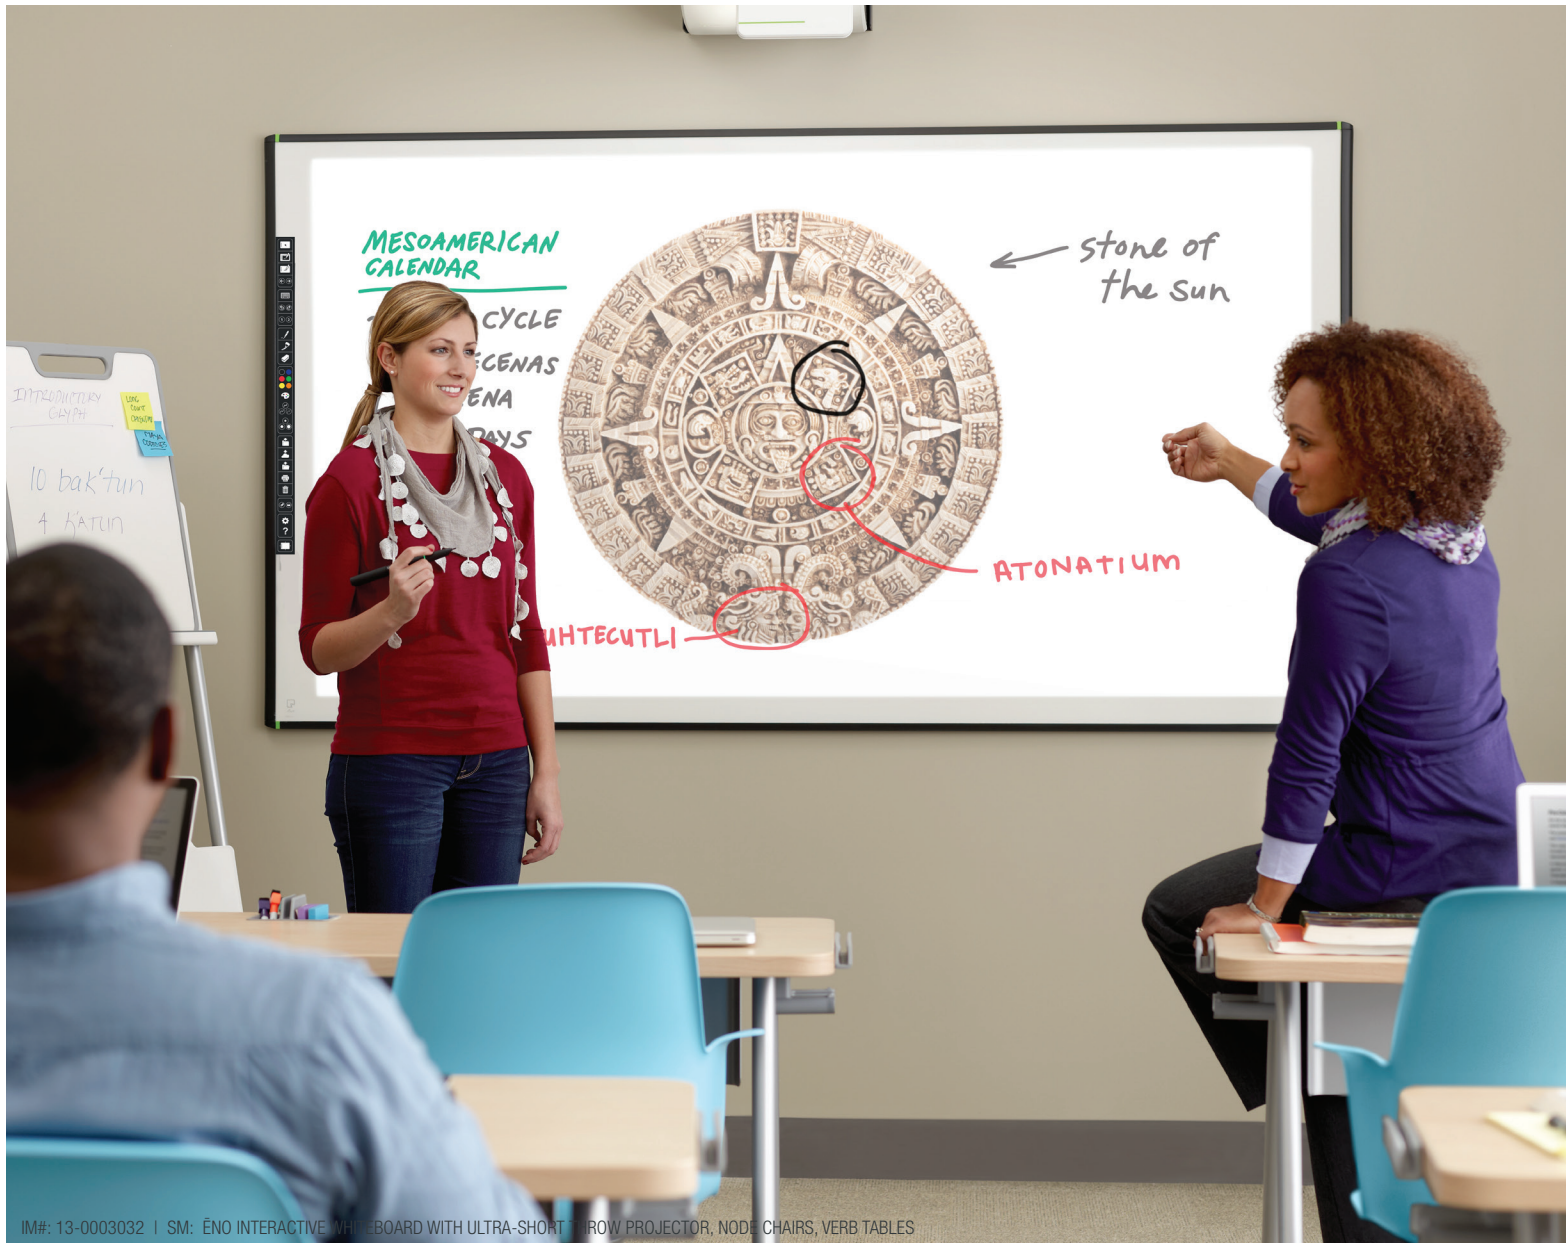

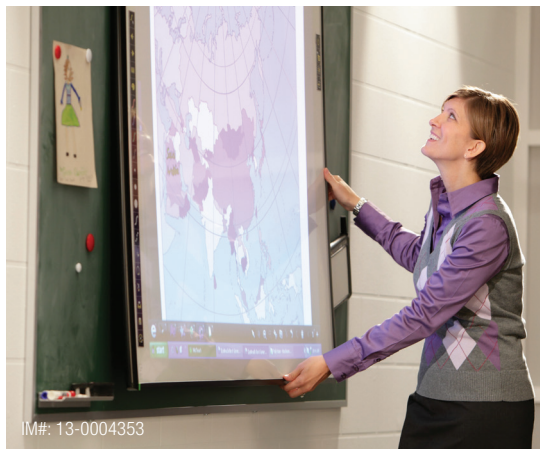

ēno play fills the room with rich, even sound, bringing multimedia content to life

share, engage, inspire.

ēno is the greenest interactive whiteboard on the market with the lowest total cost of ownership. Environmentally certified, ēno offers a Forever Warranty™ on the dry-erase and interactive surface.

It requires no power and the ēno application is easy to install on users' computers. Simple to use, ēno adapts along with the pedagogies in the classroom.

IM#: 13-0004353

SIMPLE INSTALLATION

Wall-mount or magnetic installation options available for ease of installation and maintenance.

IM#: 13-0004352

DURABILITY

The patented e³ environmental ceramicsteel™ promises years of heavy classroom use without ghosting or denting.

IM#: 13-0002339

EASY ICON STRIP

Focus on teaching, not technology – one click saves an entire session of work and distributes content digitally or sends to print.

IM#: 13-0003046

WORRY-FREE CONNECTION

The Bluetooth-enabled stylus pairs wirelessly to the USB receiver, providing seamless connectivity for instructors, even if they need to change classrooms.

IM#: 13-0003035

FLEXIBLE LESSONS

Open content allows ēno to work with any software running on the connected computer.

MULTIPLE USERS

Use up to three stylus' simultaneously, encouraging collaboration within the classroom.
