

SunTower™ Wide Area Lighting

FEATURES:

- cULus Listing
- Wet Location Rated
- Safety Tip-over Protection
- GFCI Duplex Receptacles
- Weatherproof On/Off Control
- All Terrain Heavy Duty 10" Tires
- Detachable Dual Stage 12' Mast
- Integrated Rear Mounted Ballast
- Integrated Cable Storage Hooks
- Integrated Mast Locking Safety Pin
- Platform Accessory / Storage Space
- Optional Protective Wire Fixture Guard
- Welded Large Gauge Steel Construction

Ericson's SunTower™ Wide Area Lighting Solutions combine ease of use and configuration flexibility, with essential safety features, to deliver industry leading temporary lighting performance. The SunTower™ lighting solutions are ideal for a broad range of portable wide area lighting applications, whether located indoors or in the field.

All-weather construction, weather-proof on/off control, GFCI receptacles, the industry's first tip-over protection, locking safety pin, and essential cULus wet location listing all represent Ericson's commitment to safety that can only be achieved through rigorous design standards, product testing and independent certification.

Setup and positioning is greatly simplified by incorporating large all-terrain tires, a detachable mast, and cable storage system. Integrated accessory and storage space also adds convenience and flexibility, while also providing an ideal platform for generator-based operation.

SunTower™ Wide Area Lighting Solutions are built to last. The rugged frame construction is made of welded large gauge square steel tubing which is then powder coated for protection against the most challenging environmental conditions, and field maintainability and supportability is ensured with factory replacement parts.
