Combustion Gas Analyzer to use with Your Smartphone & TPI App

**DC710C1**

SAVE TIME by easily managing documentation! Use FREE smartphone app to document and share measurement results with your clients, and keep on file.

- Operate remotely via Bluetooth with smartphone or tablet and TPI app. No need for long probe hoses – remain at the control center with your smartphone, while the DC710 works at the stack. The free TPI app provides on-site reports which can instantly be emailed and stored without the need for paper or printers. 24-Hour real-time clock for time-stamp confirmation.

- Durable, rugged and sealed housing; with powerful magnet and/or hook for mounting.

**DC710C1** includes DC710 instrument, flue probe, temperature probe, rechargeable battery, charger, and case. Smartphone not included.

Connect to Smartphone!

### Standard Accessories Included with TPI Analyzers

- **A763 Mini Pump Protection Filter**: Provides additional protection for the pump and strain relief for the flue probe.
- **A765 Protective Rubber Boot**: Included with all. See photo on page 3.
- **A770 Flue Probe**: Flue probe w/ water trap and filter 7.5 foot length.
- **A787 Carrying Case**: Soft padded carrying case with shoulder strap.
- **A794 In-line Water Filter**: Replacement water trap for 708.
- **A796 In-line Water Filter**: Replacement water trap for 708, 709, 709R, 712, 714, 715 and 716. Includes one A794F particle filter and A794W water filter.
- **A797 Carrying Case**: Replacement water trap for 708, 709, 709R, 712, 714, 715 and 716. Includes one A794F particle filter and A796F water filter.
- **GK11M K-type Thermocouple**: Fiberglass insulated multi-purpose beaded thermocouple probe.

### Popular Optional Accessories

- **Infrared Printer**: A740
- **Replacement Printer Paper(2 rolls)**: A746
- **Replacement CO Sensor**: A760
- **Replacement Oxygen Sensor**: A761
- **20 Foot Flue Gas Analyzer Probe**: A770-20
- **PC Software (for 712 only)**: A772
- **Oil Filter**: A773 (except 716N)
- **Silicone Tubing 6’**: A774
- **Static Pressure Tip**: A776
- **Adapter Tubing**: A791
- **Replacement Filter for Water Trap**: A794F
- **Filter for In-line Water Trap**: A794W
- **Natural Draft Probe**: A797
- **USB Cable and Software for 716**: A807
- **Hard Carrying Case**: A917
- **Magnetic Hanging Strap**: A124
- **Magnetic Hanging Strap with Hook**: A125
- **Threaded Pipe Plug**: TP1
Add Value to Your Service Calls

Minimize call-backs by using TPI analyzers to verify and document combustion efficiency, before and after service. This provides evidence of an effective tune-up, or evidence of the need for equipment replacement. Documented, accurate and reliable, combustion efficiency data helps deliver peace-of-mind to your client - helping in the decision making process.

Quick & Simple Setup Saves Time

Fast-purge and the ability to perform fuel selection during start-up enables tests to be performed quickly without requiring extra set-up time after initial start-up. TPI analyzers also use the last selected fuel as the default setting, alleviating the need to perform fuel selection each time the analyzer is used for the same fuel. The DC710 (on cover) saves even more time, as printer setup is not necessary.

Types of Combustion

- **Perfect Combustion:** complete burning of the fuel with the exact amount of air. (This is rare and something technicians never see in analysis.)
- **Complete Combustion:** complete burning of the fuel. However, excess air (O) is found in the flue gases. Excess air is added to ensure there is enough air present to avoid incomplete combustion.
- **Incomplete Combustion:** the incomplete burning of fuel due to an excess or lack of one side of the combustion triangle (fuel, air, ignition).

Learn more about using Combustion Analyzers in a TPI Combustion Training Seminar.

Ask your distributor about hosting a training in your area, or please call 1-800-368-5719 for more information on training options.

### 777 Personal Carbon Monoxide Monitor

**Durable, Always-On, CO Monitor**

Easy, one-button operation with audible, visual and vibrating alarm for STEL and TWA. Two-year battery life. Designed for personal safety, and useful in these areas and more:

Oil & Gas; Fire Departments; Industrial Workers; Home Inspectors; HVACR; Residential Appliance Repair, Property Management and Housekeeping
621C3 Pressure Kit

Everything you need to test air flow, static pressure drop, and take draft pressure measurements. $259.95

- Temperature compensated for improved accuracy
- Adjust appliance regulators; set delivery pressures; perform leakage "shut-in" tests; test pressure switch operation on 2-stage gas furnaces in both positive and negative pressures
- Regulator adjustments for pressure and lock-up tests
- When setting up a high efficiency gas hot water heater, you need to check the static pressure in the exhaust stack. Do this by using the static tip and firing up the gas hot water heater, then capture the min and max readings. If not enough pressure out the exhaust, wind can blow down the exhaust and extinguish the pilot light.

Kit Includes: 621 Dual Input Digital Manometer; A774 6’ silicone tubing; A776 (2) static tips; A605 (2) 1/4” tapered “T”; A791 Adapter tubing; A603 (2) brass fittings, 1/4” NPT to 1/4” barb; A901CP Shoulder strap carrying case; A612 Protective rubber boot

623 Dual-Input Digital Manometer

Dual-input, autoranging digital manometer with three decimal place resolution.

- Check for positive building pressures; perform room to room pressure diagnostics
- Test duct pressure and perform static pressure checks; test pressure switch on two-stage gas furnace in both positive and negative pressures.
- 0.001 inH20/KPa resolution, with +/- 0.02 accuracy less than 2 inH20
- Temperature compensated; and overpressure protection +/- 50 inH20

608 Single-Input Manometer

Measures pressure or vacuum in four units of measure.

- +/- 60 inH2O range, with backlit display
- Built in hanging hook and magnets
- 4 PSI over pressure
- Temperature compensated

Applications:
- Regulator adjustments
- Tankless hot water heaters
- Boilers
- Gas furnaces
- Air Handlers including HRV (Heat, Recovery, Ventilation)

665 Tuffman™ Digital Manometer

Rugged aluminum housing; and high-resolution: 0.001 PSI up to 99.999 PSI.

- Push button zero for altitude correction
- Seven selectable units of measure to choose from: mmHg, inHg, kPa, Bar, PSI, inH20, and mmH20
- Large easy-to-read LCD, with backlight (auto shut off after 10 seconds)
- Auto-off after 20 minutes (except REC mode or data logging to save battery life)
- Record minimum and maximum readings; and data hold
- Datalog 5000 readings with adjustable interval of from 1 second to 24 hours.
- Use the OPTIONAL IR to USB cable to connect to computer

665L: Dual input with differential range +/- 100 psi that can be used in non-corrosive liquid applications.

A665: Software USB cable data logging station for 665.

1010A Indoor Air Quality Meter

Measure CO, Humidity & Temperature

Use the 1010A to determine air quality in commercial buildings and facilities. Measure air control system performance

Applications:
- Facility air quality
- Air control system performance

Ranges:
- CO2: 0 to 5,000ppm; CO: 0 to 500ppm
- Temp: -5°F to 140°F (-20°C to 60°C)
- Relative Humidity: 5 to 95%
- Dew Point: -47°F to 135°F (-44°C to 57°C)
- Wet Bulb: 3°F to 135°F (-16°C to 57°C)
- Calculated % Outside Air: 0 to 100%
TPI Smart Probes & Free TPI App

Wireless Smart Probes work conveniently with your smartphone or tablet to make measurement of airflow/speed, temperature, pressure and even CO2 easy and affordable.

Smart Probes and the TPI Smart Probe App provide remote access to data using Bluetooth technology. Measurement data is sent to your smart device, and can then be managed electronically. Email reports, store data, and reduce your paperwork.

SP341 K-Type Thermometer measures temperature with any sub-mini K-type probe. Calculate temperature differential, and record min/max & average. Auto-field calibrate. Measure temperatures in ducts and at vents or registers, as well as room temperatures. Range: -58° to 2462°F (-50° to 1350°C)

- Measure temperature of ambient air, and at registers and vents
- Measure temperature differential
- Calibrate thermostats

SP565 Hot Wire Air Velocity Probe measures air velocity & temperature in air vents with telescoping hot-wire probe. Record m/s, km/h, ft/min, knots, mile/h.

- Air velocity measurements in HVAC systems
- Air duct analysis to balance commercial and residential HVAC systems

SP620 Pressure Probe with +/-60 in H20 input range to measure gas manifold pressure, duct pressure, and perform static pressure checks.

- Test duct pressure & perform static pressure checks
- Adjust appliance regulators
- Test pressure switch on a 2-stage gas furnace in both positive and negative pressures

SP1000 CO2 Probe measures ambient CO2 up to 6000 ppm.

- Measure CO2 in the work place or other at-risk environments.
- Monitor performance of air control systems.

Download the free TPI App by scanning the QR code. For information on all Smart Probe accessories, please visit our web site: testproductsintl.com.
TPI (Test Products International, Inc.) offers a full calibration and repair service for all TPI branded equipment. TPI recognizes the importance of fast service for combustion gas analyzers and typical turnaround time is 3 to 5 days. Combustion analyzers are serviced on a first received basis. Analyzers received via expedited shipping are given priority. To maximize sensor life TPI installs and calibrates all sensors at the time of order. Sensors must "burn in" for 24 hours prior to calibration and shipment.

All warranty service is done at no charge. At the time of service, any available software updates will be installed at no charge regardless of warranty. For service or repair out of warranty, TPI provides a complete estimate of charges for approval prior to performing any service work.

For more information visit www.testproductsintl.com
