

VoiceLink I wireless classroom microphone system

The VoiceLink I system will expand your multi-media sound system to include voice reinforcement via an infrared wireless microphone. The VoiceLink I is a preamp receiver and is designed to be plugged into the input of a multi-media sound system.

The ESSENTIAL classroom sound-field system

An infrared transmitter/microphone transmits the voice clearly heard through the room with ease. The Auxiliary input on the front panel allows the output of a computer, DVD or iPod to supplement the instructional program.

The voice is a teacher's most powerful teaching tool, but it also needs to be protected. The VoiceLink I system allows the teacher to speak more comfortably and be heard more precisely, no matter where the teacher is located.

TeachLogic has developed infrared technology to a very high level that guarantees constant connectivity. Our microphone capsules ensure that you can achieve the maximum amount of gain before feedback, while maintaining a very natural reproduction of the presenter's voice.

Sapphire
(IRT-55)

Microphone Transmitter

The Sapphire's light weight, small size, and optimum performance make it the ideal infrared microphone to complete any of our infrared classroom system packages.

VoiceLink I wireless classroom microphone system

Receiver Features

- One IR wireless microphone receiver
- One Auxiliary front panel line level input with adjustable gain, 3.5mm input jack
- Two RCA sensor inputs
- Mounting bracket
- Light Weight 1lb.

All Voicelink I Systems Include

- VoiceLink I Receiver IR-100
- Ceiling Sensor with 50' plenum rated cable for IR connectivity throughout room ICS-55

Complementary Components to Complete the System

System Models

IRV-1150

Sapphire transmitter/microphone with *Lithium* battery (IRT-55), Plug-in battery charger (BRC-15)

IRV-1350

Handheld transmitter/microphone with Duracell NiMH battery (IRH-35), Drop-in battery charger (BRC-101)

The VoiceLink I is a preamp only receiver and is designed to be plugged into a power amplifier or the input of a multi-media sound system.
