

Upgrading your Prime thermal cycler to a gradient unit

Introduction

One of the advantages of the Prime range is that a standard 3PrimeX or Prime model can be upgraded to a gradient unit by purchasing an upgrade code. The process does not require the unit to be returned to base and all that is required is access to our Techne website.

Gradient upgrade procedure:

- | Procedure | Prime | 3PrimeX |
|---|--|---|
| <ul style="list-style-type: none"> Turn on the Prime unit. On the home screen, touch Settings and then More Settings, followed by Add Gradient Feature. Go to the address www.techne.com. Click on Support then Technical Support. Under Further Information on the right hand side click on Thermal Cycler Gradient Upgrade. Insert the serial number from the Prime into the website twice as instructed. Insert the upgrade code into the website. Click Show confirmation number. Insert the upgrade code and confirmation code into the Prime and touch Validate. The Prime is now upgraded. |  <p>The screenshot shows the Prime unit's settings menu. It has a dark background with white text. At the top is 'Service Settings' with a lock icon. Below it are 'Add Gradient Feature', 'Oligo Tm Calculator', and 'More Settings'. At the bottom are three buttons: 'More Settings', 'Save' (highlighted in orange), and 'Cancel'.</p> |  <p>The screenshot shows the 3PrimeX unit's settings menu.
