## Product Data Sheet

---

Product Number: 758ST555

Model: Heel Grounder, 1 MegaOhm, ESD-Safe, Snap Lock Buckle, Two Layer Rubber, Black

### Description:

Features a tough dual-layer rubber, cut at 1.5" wide, provides the largest surface contact, plus a rotating heel-to-sole, sole-to-heel cup design for maximum longevity. We recommend each operator dress with two heel grounders, one for each foot. This will create a parallel path to ground when standing (two feet down) and provide additional peace of mind when walking about, as one heel grounder will always remain in contact with the grounding surface i.e. ESD floor.

### Picture:

---

**Scope:** This specification defines the technical requirements for heel grounders under the brand Techni-Pro. If not otherwise specified, the grounding snap should meet or exceed the requirements of ANSI ESD-S20.20 and ESDA Standard 1.1-2006

### Applications:

Heel grounders provide a path-to-ground for operators that must be mobile. Operators should wear two heel grounders, one for each foot and be used in conjunction with an anti-static floor or mat.

Closure Type	Snap-Lock
Non Marring	Yes
Resistor	Yes
Fastener	Buckle
Reusable	Yes
Material	Two-Layer Rubber
Size	1.5" x 7"
Color	Black
