The Universal Snap Kit includes the hardware needed to install a 10 snap into surfaces and mats up to 3/8in thick according to ANSI ESDS20.20. The kit includes a 10mm stud, 10mm socket, threaded backing washer, conical nut, long screw, short screw for use with a variety of ground cords. Installed with a Phillips screwdriver. 10 snap kits per pack

Picture:

Scope:

This specification defines the technical requirements for grounding snaps under the brand Techni-Pro. If not otherwise specified, the grounding snap should meet or exceed the requirements of ANSI-ESDS20.20

Installation:

Punch a hole through the material with a small Phillips screwdriver or awl. Select 1 snap and 1 screw length - material less than 0.100" thick use the short screw and material greater than 0.100" thick, use the long screw. Insert the screw through the top on the snap stud or socket, the washer, and the material. Affix the assembly with the conical nut supplied with the kit and tighten down the screw using a Phillips screwdriver. The remaining hardware, and either a long or short screw to be discarded or saved for another application.
