ELLIPSE MIX

INTELLIGENCE TAKEN TO THE LIMIT

90+
Milles

- 100% immune to corrosion, made of corrosion-proof materials
- Quick and tool-free assembly in less than 1 minute
- Interference free design

DAT MIX LR

THE LONG-RANGE INTELLIGENT ANTENNA

110+
Milles

- Great directivity for extremely difficult reception conditions
- Made of aluminum for a long service life
- Dual mast mount points to ensure stability

DISCOVER THE KEY STRENGTHS EXPERIENCE THE WORLD

BOSS System, powered by high

These intelligent antennas integrate the **BOSS Technology** (Device that stands for Balanced Output Signal System).

The BOSS system automatically controls the level of the received signal (either very

VHF and UHF indep

Split dual band regulation minimized large signal level differential between VHF and UHF. Two BOSS devices are included in the

performance TForce technology

high or very low) to always provide optimal output level.

Forget about signal level reception and fluctuations. BOSS fixes that for you!

Independently controlled!

antenna so each band is independently analysed and regulated in order to provide an optimum balanced output signal level.

DINOVA MIX

ATTIC OR OUTDOOR MOUNT LOW VISUAL IMPACT ANTENNA

70+
Milles

- Aesthetic unobtrusive design (attics, historic buildings, protected areas...)
- Highly resistant chassis protects against adverse weather (even salt air or humidity)
- Heavy clamp and support provide robustness and stability

BEXIA

OUTDOOR PERFORMANCE, INDOORS

55+
Milles

- Multidirectional reception (360°), no pointing needed
- Mountable in any position
- Two powering options: from TV (USB port) or with wall charger

MAST AMPLIFIERS

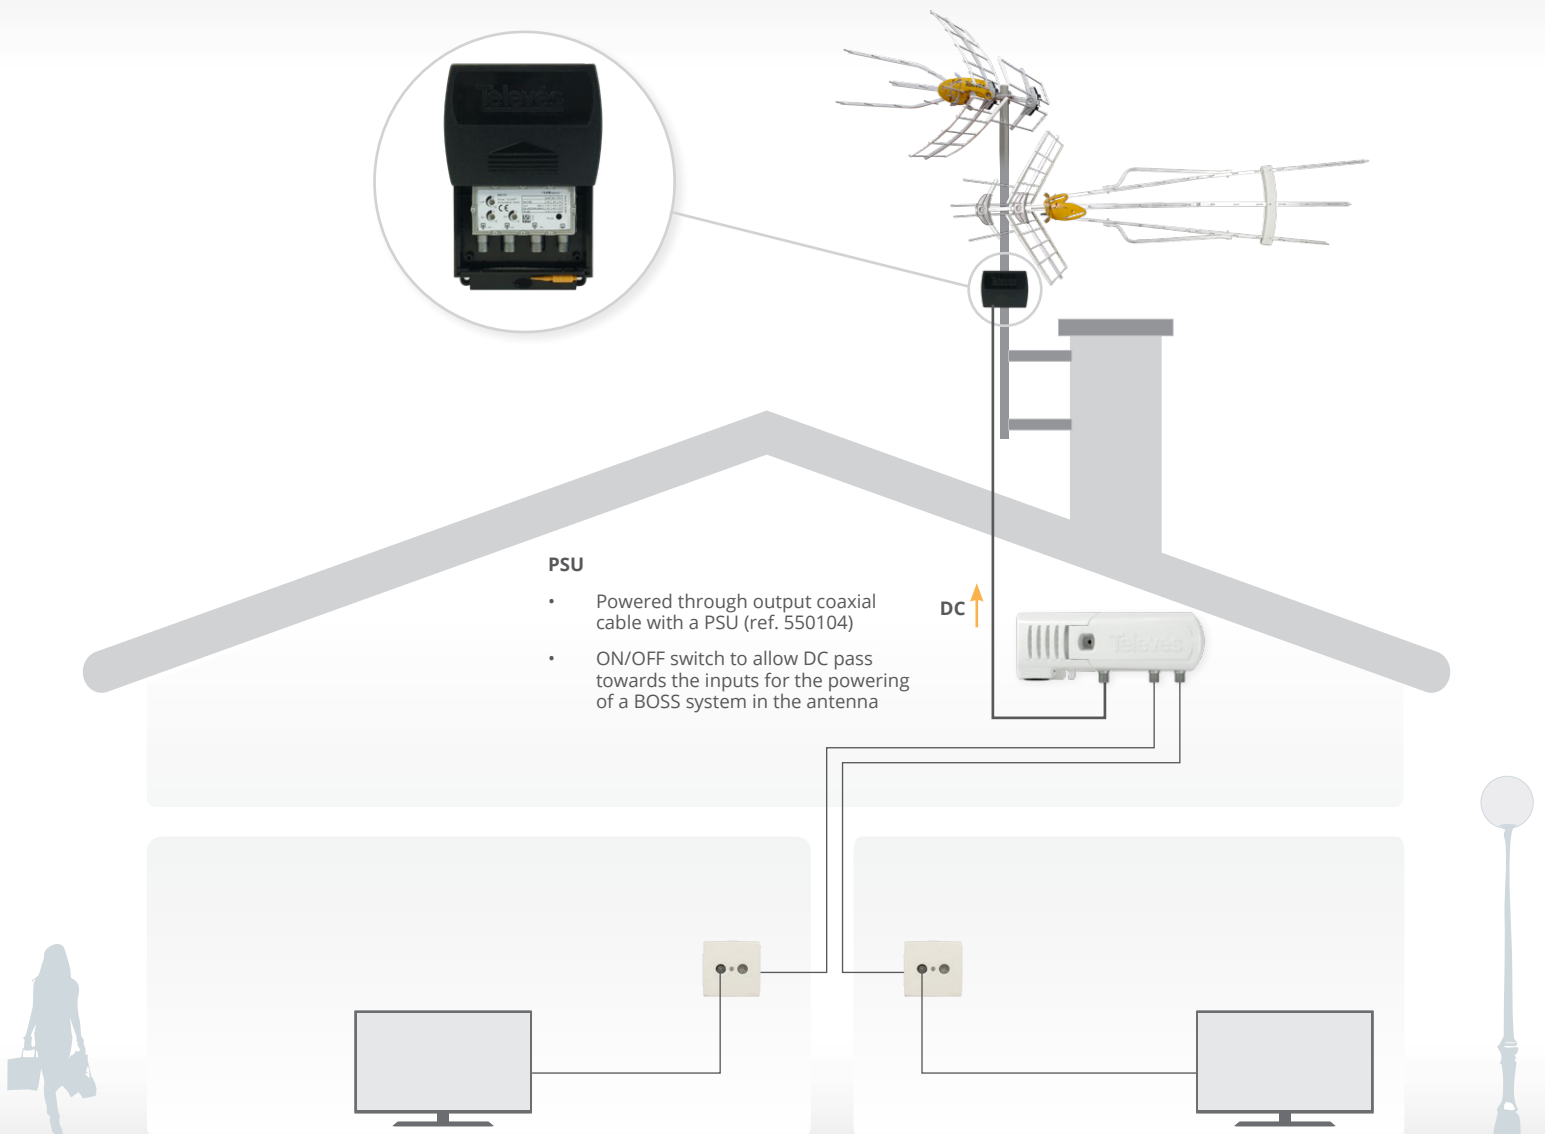

Mast amplifiers are active devices that filter and amplify television signals and allow the installer to adapt the output level to the characteristics of the distribution network.

Get the most out of:

- **BOSS technology** integrated: automatic gain regulation provides optimum output levels.
- **Dual band amplification:** VHF and UHF are independently regulated.

And also:

- 2 models: 1 or 2 inputs.
- Outdoor mounting: weatherproof case.
- Highly shielded Zamak chassis.
- "F" connectors.

PSU

- Powered through output coaxial cable with a PSU (ref. 550104)
- ON/OFF switch to allow DC pass towards the inputs for the powering of a BOSS system in the antenna
