

testo 310

Residential combustion analyzer

For testing and troubleshooting furnaces, boilers and other combustion devices.

Residential combustion analyzer

O₂, CO*, CO₂, °F, draft, pressure, automatic calculations, printer option and more.

Bright backlit display

Five-line backlit display with two-line readout and easy-to-navigate menu structure.

Fastest startup available

Start testing faster - in only 30 seconds.

Quick exchange probe filter

Protect the instrument's measurement accuracy with replacement filters.

Powerful magnets

Powerful magnets on the 310's housing allow for hands-free operation.

Connected hose & probe

Always ready for testing, the 310's probe and kink-free hose is connected to the analyzer.

testo 320

Heavy Duty residential / light commercial combustion analyzer

For frequent testing and troubleshooting of furnaces, boilers and other combustion devices.

Heavy duty residential/light commercial combustion analyzer

O₂, CO*, CO₂, °F, draft, pressure, automatic calculations, graphic display, memory, (optional software, Bluetooth, printer, ambient CO) and more.

Internal memory

Store up to 500 tests.

Pre-calibrated sensors

Typically last more than three years. Sensors are field replaceable and pre-calibrated.

More measurement options:

- Ambient CO
- CO sensor with NO_x filter standard
- Gas leak
- CO₂
- And more...

Hardened cam-lock fittings

Provides leak-free operation and greater test confidence.

testo 330 LL

Commercial / light industrial flue gas analyzer

For testing of commercial and industrial boilers, furnaces, and other combustion devices, (NO_x optional)

Commercial / light industrial combustion analyzer w/NO_x option

O₂, CO*, CO₂, (NO_x option), LONG-LIFE SENSORS, (range extension with dilution system option), °F, draft, pressure, automatic calculations, graphic display, memory, (optional software, Bluetooth, printer, ambient CO) and more.

Internal memory

Store up to 500,000 readings.

Long-life sensors standard

The longest-life sensors with highest accuracy and reliability are standard. (Integrated dilution system optional) provides range expansion and over-range protection in commercial/ industrial testing.

Graphic Display

A large display provides a graphical view of ideal combustion setup as well as trending graphs of combustion parameters.

* All Testo CO sensors have integrated NO cross-interference filters required to provide accurate measurements

Testo Combustion Analyzers

- Does the job right the first time
- Features and accessories to perform more jobs
- Designed to last for the long haul
- Backed by 50+ years of HVAC expertise

Testo's complete line of combustion analyzers makes testing easier to perform, easier to control, and easier to understand.

testo 310 -

Right the first time - every time.

The testo 310 residential combustion analyzer represents a new class of instruments for Testo and provides exceptional value and expanded capabilities in combustion testing.

testo 320 - Comprehensive combustion analysis.

The 320 is designed for the job site and for the contractor that expects more. Use it for basic testing and tuning of all types of boilers, heaters, or furnaces. Use it to set up and commission more complex multi-stage, or modulating heating systems.

testo 330 LL - The ultimate in combustion analysis.

Everything you could want in an analyzer including upgradeable NOx. Additionally testo 330 LL's have the

longest service life available with an expected sensor life span of up to six years.

testo 310, 320, & 330 kits

Kits	Part No.
testo 310 combustion analyzer kit: Analyzer, probe w/ cone, silicon tubing, extra particulate filters (5), AC power supply (with USB), pressure plugs (5), and calibration certificate and case.	0563 3100
testo 310 combustion analyzer kit with printer: testo 310 kit plus IR printer, and 2 rolls of thermal paper.	0563 3110
testo 320 combustion analyzer kit: Analyzer, probe with cone, AC power supply (with USB), and case.	0563 3220 70
testo 320 combustion analyzer kit with printer: testo 320 kit (0563 3220 70) plus IR printer and 6 rolls of thermal paper.	0563 3220 71
testo 330 1G-LL combustion analyzer kit 1: testo 330-1 G-LL analyzer, probe, filters (10), power supply, and case.	0563 3371 70
testo 330 1G-LL combustion analyzer kit 2: testo 330-1 G-LL analyzer, probe, spare filters, power supply, case, IR printer, and 6 rolls of spare paper.	0563 3371 75
testo 330 2G-LL combustion analyzer kit 1: Analyzer (w/ 8,000ppm CO plus dilution), probe, power supply, spare filters, and case.	0563 3372 71
testo 330 2G-LL NOx combustion analyzer kit 2 testo 330-2 G-LL Kit #1 with dilution plus NO (0-3000 ppm).	400563 3372
