Refrigerated and heated bath circulators

Customizable solutions designed to meet your needs today and tomorrow

E

Arctic and Sahara Series refrigerated and heated bath circulators

Your application is as individual as you are. Bath circulators provide temperaturecontrolled fluid circulation to support diverse workflows in laboratory and process applications. Bath circulators support water conservation by replacing tap water for cooling and heating, saving thousands of dollars per year.

Using over 50 years of expertise, we designed Thermo Scientific[™] bath circulators to meet the demands of temperature-control applications in scientific, research, and industrial labs. Our reliable immersion circulators can be used alone or with one of the bath solutions for analytical instrumentation, jacketed reactors, and rotary evaporators.

Customizable solutions designed to meet your needs today and tomorrow

- Extensive choice of temperature ranges, pumping capacities, and bath volumes, with leading warranty coverage
- Selection of intuitive displays to support your application and budget
- A range of accessories and inserts for sample security and management

Robust reliability even in the most demanding applications

- Digital control technology for precise temperature control and stability
- Powerful pumping capacity for external fluid circulation
- Corrosion-resistant stainless steel work area

Support for you and the environment

- Technical expertise and support at your fingertips
- Service provided by dedicated local, depot, and technical support team
- Sustainability in mind with water conservation, energysaving options, and zero-waste manufacturing

Flexibility to customize

All systems and immersion circulators come standard with external circulation connections

Immersion circulators

Choice of 8 controllers that can be paired to an existing tank, vessel, or bath to heat the fluid

Bath circulators

Choice of heating and cooling temperature control with a large selection of stainless steel baths as well as economical polypropylene baths

Accessories

An extensive selection of accessories, from work area covers to racks and inserts to heat transfer fluids to provide ultimate flexibility

Immersion circulators

Thermo Scientific[™] Standard, Advanced, and Premium Series heated immersion circulators offer advanced, precise sample temperature control. Powerful, integrated pumps ensure uniform temperature distribution for external circulations usage or internal temperature control.

- Programmable with temperature set points and ramping
- The controller can be indexed 90° for optimal viewing
- Real temperature adjustment (RTA) for calibration
- Audio/visual alarms for temperature and levels
- Adjustable pump speeds for flow or bath agitation
- Auto-restart after power failure
- On/off timer with real-time clock
- USB/serial communication options

Standard (SC) Series-choose from 3 versions

Designed for ease of use with powerful pumping and heating capabilities for closed-loop applications, this economical choice offers solid performance for applications with temperatures ranging from +13°C above ambient to 150°C.

Advanced (AC) Series-choose from 2 versions

This series offers greater pumping performance, ramp programming, application alarms, and temperature ranges from +13°C above ambient to 200°C.

Premium (PC) Series-choose from 3 versions

This series is ideal for applications that require sophisticated control, multiple ramp programming, and extreme temperature performance, ranging from +13°C above ambient to 300°C.

Performance curves for refrigerated bath circulators

Cooling capacity

Specifications obtained at sea level using water (above 5°C to 90°C) or a fluid with a specific heat of 2.3 kJ/kg-K or 0.55 Btu/lb-F (less than 5°C) as the recirculating fluid at a 20°C ambient condition, at nominal operating voltage. Other fluids, process temperatures, ambient temperatures, altitude, or operating voltage will affect performance. Specifications are for reference only and are subject to change.

Sahara Series heated bath circulators

13°C above ambient to 300°C

When your application requires a high temperature, rely on our durable, seamless, stainless steel baths Thermo Scientific[™] Sahara[™] Series heated bath circulators are available in capacities from 7 to 53 L, with a variety of work area dimensions to meet your application needs.

- Up to 8 different controllers are available
- The controller can be indexed 90° left or right for easier viewing
- Rugged and corrosion-resistant for high-temperature applications up to 300°C

Typical applications

- Viscometers
- Spectrophotometers
- Metrology
- Thawing
- Reaction vessels
- General laboratory use

Cost-effective polypropylene (PP)

An economical alternative to stainless steel, Thermo Scientific[™] polypropylene baths are thermally resistant up to 100°C and deliver exceptional temperature performance with operational savings. Temperatures are maintained from ambient plus 13°C to 100°C.

Adding a **lifting platform** to

your bath allows you to adjust the submerged depth of your vessels or other objects.

Improve time to temperature by lowering the amount of fluid that needs to be heated or cooled. **Fluid displacement blocks** are used for external circulation only.

Operate heated baths closer to ambient temperature by removing pump heat.

Various **adapter boxes and communication cables** are available to allow for serial and analog communication.
