- Drag and drop creation
- Unlimited content zones
- Use almost any file formats
- Quick and easy updates
- Live content updates
- Remote management & updates
- Touchscreen compatible
- Use your own PC
- Standalone player available

Digital Signage Made Easy!

When you need to convey lots of information in a few seconds, TouchIT's digital signage software is the solution.

Our software lets you create digital presentations showing every piece of information you want on screen, at the same time, without the need to recreate it. Supporting play out of movies, animated images, web pages, PowerPoint®, news feeds and much more simultaneously, our software is the ultimate digital signage tool.

Our software is Digital Signage made simple. As well as being one of the most fully featured digital signage products in the world, our software is also the simplest. You simply choose the media type you want and 'add a zone' of it on to your Windows® desktop. Move it with your left mouse, resize it with your right mouse, then 'add another zone'. Keep going until you have your screen layout. It couldn't be easier. Each zone 'plays live' as you add it, so you can instantly see how your design looks. Our software IS the

tool for you - even if you don't know exactly what you need .

Our software covers almost every conceivable digital signage scenario. It's ease of use makes it ideal for those just getting started with digital signage whilst it's built in (free of charge) power features make it future proof for all the things you haven't yet considered.

Our software is 'resolution independent' and scales screen layouts automatically to the resolution you set on your player PC. Create and play your screens at HD resolution (1920 x 1080) if you like, but why stop there? Our players can operate at even higher resolutions and even operate in 'extended desktop" letting you create presentations at 3840 x 1080 or higher. Landscape or portrait, HD or HD+ and beyond, it's your choice.

What do I get with the software?

Our software is both your digital signage layout tool AND your digital signage player. Your license lets you install it onto your own desktop PC, to create your layouts and ONE dedicated digital signage player PC. If you need more than one player our 'unlimited use" site licenses offer the best value in the digital signage market place.
Our software comes with a suite of 'helper' applications to help you get the best from your digital signage network.

3 Step Creation for your Digital Signage....

Step 1, Open the software.

Step 2, drag and drop in your content and use your mouse to resize and position in place

Step 3, Add a background image and you are ready to go !

INCORPORATE ALMOST ANY FILE FORMAT !

- Unlimited Multi-Zone media play-out

- Live drag and drop screen layout creation

- Photos / Images / Entire folders

- Kiosk - Touch screen support as standard

- Play different layouts @ different times of day

- Multi-head graphics capable

- Audio files and volume controls

- Resolution independent, supports

   FULL HD and HIGHER

TOUCHIT PLAYER™
DIGITAL SIGNAGE

Built on Intel NUC Technology with an i3 processor, the Digital Signage Player from TouchIT Technologies despite only being 11cm x 11cm (4" by 4") certainly packs a punch and is the ultimate out-of-the-box signage solution!

With a 1.8ghz Intel i3 processor with integrated high performance HD 4000 graphics, the TouchIT Digital Signage Player supports DUAL screen Full HD (1920 by 1080) signage as standard, simultaneously using both the HDMI outputs.

Fitted with the Windows® 7 operating system and built in Wifi, the TouchIT Digital Signage Software, the player is easy to add to any network and directly to a network domain. It also comes with its own mounting bracket to allow easy fixing to walls and the rear of signage screens.

The Digital Signage Player from TouchIT Technologies is a complete out-of-the box signage solution. The same player can support a single screen installation as well as being a remotely controlled, centrally managed full digital signage roll-out across a large organization and multiple sites.

Small, powerful, cost effective and scalable, this is an ideal player for multi-zoned digital signage where space and budget are limited.
