

CROSS-LINKED POLYETHYLENE SHOE COVER

Part Number: VTSHCVPL

Part of the
MicroTek
product family

Description: Cleanroom contamination control, disposable shoe covers are strong and durable, impervious to liquids

Physical Characteristics: Non-particulating extruded cross-linked 100% polyethylene with heat-sealed seams. Individually inspected for seams, sizing, material & workmanship.

Length: 16" and 18" (+/- 0.5")
Width: 6" +/- 0.5"

Applications: The most economical shoecover available. Seamless design improves durability & cleanliness. Material used offers full liquid protection. Commonly used in microelectronics & pharmaceutical industries as preferred low cost product.

Test Methods: Product conforms to the following test standards:
 IEST-RP-CC-003.3 Helmke Drum method.
 Particles >0.5µm released from the samples during tumbling were enumerated using a Met-One 3313 Airborne Particle Counter. Results are reported as the average of particles >0.50µm/minute/sample. Particle counts correspond to Category I cleanliness level.

Test Results: Particles >0.5 µm/minute: 42 average
 P010: Particle Cleanliness, Helmke Drum
 Coefficient of friction: 0.54 µs

Available Sizes:	Part#	Weight	Basis Weight	Color	Size
	VTSHCVPLW-BL	Light Weight, 3 mil	20 gsm	Blue	LG 16"
	VTSHCVPL-WH	Standard Weight, 5 mil	40 gsm	White	LG 16"
	VTSHCVPL-BL	Standard Weight, 5 mil	40 gsm	Blue	LG 16"
	VTSHCVPLHW-BL	Heavy Weight, 8 mil	60 gsm	Blue	LG 16"
	VTSHCVPLHWX-BL	Heavy Weight, 8 mil	60 gsm	Blue	XL 18"
	VTSHCVPLHWX-WH	Heavy Weight, 8 mil	60 gsm	White	XL 18"

Color: Blue and White

Packaging: Flat packed in poly bags
 100/Bag, 3 Bags/Case
 (150 Pairs/Case)
 Blue exterior, 5 layer/double walled carton
