

Mantis IOTA and ERGO Clear LED Covers

Vision Engineering are pleased to announce the release of the clear LED covers for the Mantis IOTA and Mantis ERGO.

These clear LED covers are an optional replacement for the standard LED covers on an IOTA and ERGO. While the standard covers are yellow tinted, these new covers are clear, providing illumination that will appear whiter to the user, without the yellow tint.

Please refer to the table below for the part numbers:

	IOTA	ERGO (left)	ERGO (right)
Standard (Yellow)	2310144	2311473	2311474
Option (Clear)	2310144B	2311473B	2311474B

These covers can be retrofit in place of the standard covers, ideally by a distributor or branch using the same screws. Simply remove the old covers and reinstall the clear covers in their place. Please see the below image of the 2310144B cover.
