

VoiceLink III wireless classroom microphone system

The VoiceLink III system is a infrared wireless microphone system that can be an addition to any existing multi-media sound system. Whether in a classroom, conference room, or banquet room.

The ESSENTIAL classroom sound-field system

The VoiceLink III features a two-channel infrared wireless microphone receivers (preamp-only) for the simultaneous use of two wireless microphones: no messy cables and you have total freedom of movement throughout the room. One Line level input for Computer, DVD or other line level device with front and rear panel input connections. One ALS (Assistive Listening System) or Recording output.

Excellent vocal quality and reliable connectivity in excess of 30-foot radius (1,600 sq. ft.) to a central ceiling sensor. Interference-free transmission with 100% program material security (infrared will not transmit through walls).

TeachLogic has developed infrared technology to a very high level that guarantees constant connectivity. Our microphone capsules ensure that you can achieve the maximum amount of gain before feedback, while maintaining a very natural reproduction of the presenter's voice.

Sapphire
(IRT-55)

Microphone Transmitter

The Sapphire's light weight, small size, and optimum performance make it the ideal infrared microphone to complete any of our infrared classroom system packages.

FOR SOUND LEARNING

VoiceLink III wireless classroom microphone system

Receiver Features

- Two infrared wireless microphone receivers
- One Line Level Computer/Aux input 3.5mm front or Dual RCA inputs rear panel
- Lesson Capture output with level control on front panel (3.5mm)
- Balanced line output 3-pin phoenix connector
- Unbalanced output, 1/4" phone, line level output
- Two external sensor inputs for ultimate coverage

All Voicelink Plus Systems Include

- Voicelink III Receiver IR-255
- Ceiling Sensor with 50' plenum rated cable for IR connectivity throughout room ICS-55

Complementary Components to Complete the System

System Models

IRV-6150c

Sapphire transmitter/microphone with Lithium battery (IRT-55), Plug-in battery charger (BRC-15)

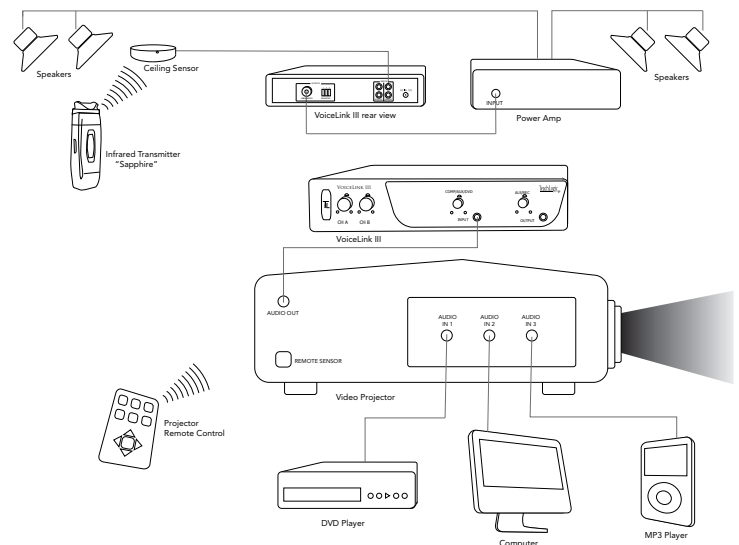

IRV-6650c

Sapphire transmitter/microphone with Lithium battery (IRT-55), Handheld transmitter/microphone with Duracell NiMH batteries (IRH-35) and drop-in charger (BRC-55)

IRV-6655c

Two Sapphire transmitter/microphone with Lithium battery (IRT-55), and drop-in charger (BRC-55)

The VoiceLink III is a preamp only receiver and is designed to be plugged into a power amplifier or the input of a multi-media sound system.
