Few projector applications are as demanding as a 24/7 operation, requiring projectors designed and built for durability and to the highest quality specifications.

With close to 20 years of projector design and manufacturing experience, Optoma projectors are renowned the world over for their exceptional quality and durability. Delivering consistent performance year after year, even under the most demanding conditions, including 24/7 operation.

Optoma offers one of the largest selections of projectors warranted for extended use and around the clock operation with minimum down time.

24/7 Operation Maintenance and Service Guidelines

- For optimum performance, Optoma recommends projectors should be powered off for 30 minutes after every 24 hours of operation.
- Schedule lamp replacements in advance. It is always a good idea to keep a spare lamp on hand.
- Lamp brightness will gradually decrease over the lamp's lifetime. This is a normal condition.

24/7 Operation Warranty

- Maximum projector warranty - 2 years
- Lamps are warranted for 2000 hours or 90 days, whichever comes first (applies to most models).
