

WaveStation Rack Mount

Thank you for purchasing a Teledyne LeCroy WaveStation Rack Mount accessory. Please review these instructions before installing the rack mount.

Parts

The rack mount kit is shipped with the following parts assembled as a unit. Contact us if parts are missing.

Parts	QTY
Faceplate	1
Handles	2
Mounting Brackets	2
Shoulder Bolts	2
M4x10 flat-head Phillips screws (for brackets)	8
M5 Phillips screws w/ lock washers (for handles)	4

Note: The kit does *not* include four, M5 screws needed to attach the rack mount to your equipment rack. We recommend using at least 10 mm length screws.

The weight of the rack mount kit by itself is **3.36 lbs.** You will need **3U** of space in your rack to mount the unit.

Tools

You will need a small Phillips-head screwdriver to attach the rack mount to the WaveStation.

Installation

Numbers on the image correspond to steps in this procedure.

1. Remove the plastic handle on the WaveStation by pulling outward on the knobs while rotating the handle forward/backward.
2. Remove the four screws attaching either the left OR right bracket to the faceplate, and put them in a safe location, as they will be used later. Put aside the removed bracket. Leave the handles attached to the faceplate.
3. Place the WaveStation on its back, facing upwards.
4. Slide the bracket-faceplate assembly onto the WaveStation, over the rubber corner protectors. Insert the shoulder bolt into the hole on the side from which you removed the plastic handle.
5. Slide the other bracket onto the other side of the WaveStation, inserting the second shoulder bolt to fasten it to the body.
6. Replace the four removed screws to attach the bracket to the faceplate.

Note: The fit of the brackets, faceplate, and WaveStation are intentionally very snug. You may have to provide some pressure to get the screw holes to align correctly.

7. Mount the installed unit in your equipment rack using the four empty screw holes at the edge of the faceplate.

CAUTION. Before mounting in your rack, tighten all screws to provide for the correct attachment and fit of the rack mount to the WaveStation.
