<b>Part number:</b>	05028130001	<b>Weight:</b>	58 g
<b>Article number:</b>	371 TORQ-SET® Mplus	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82054000

- Screwdriver for TORQ-SET® screws
- Multi-component Kraftform handle for fast and ergonomic screwdriving
- Mplus for more breaking torque and durability
- Handle markings simplify finding and sorting of tools
- Hexagonal anti-roll feature against rolling away

High quality Kraftform Plus screwdriver. The stronger flanks when compared with the conventional TORQ-SET profile result in 70% more breaking torque and thereby enhanced durability. Multi-component Kraftform handle for high working speeds and particularly ergonomic screwdriving. Kraftform Plus: hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. Hexagonal anti-roll feature prevents any rolling away and handle markings make for simplified finding and sorting of the tool.

**TORQ-SET® Mplus**

Kraftform Plus screwdrivers - ergonomics you can grasp. They relieve the entire hand-arm system even when used intensively. Along with other technical and product advantages such as the Lasertip for a secure fit in the screw head, Kraftform screwdrivers are the ideal choice whenever manual screwdriving jobs are concerned.

Wera developed the Mplus profile with stronger flanks compared with tools with a conventional TORQ-SET® profile. This results in approximately 70 % extra torsional strength and greatly extends the service life of Wera Mplus tools.

**Kraftform**

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design - has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

**Prevents hand injuries**

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

**Large contact area**

The large contact area - with particularly high friction to the soft zones - results in high torque transfer without any bruising from the edges.

**Rapid hand repositioning**

The hard materials used for the handle ensure rapid hand repositioning without any danger of the skin "sticking" to the handle. The surrounding hard zones with large diameters glide like wheels through the hand.

**Identification marking**

The screw symbol and tip size identification markings on the handle make it easier to find the right screwdriver in the tool case, or at the workplace.

**Non-roll feature**

The hexagonal non-roll feature prevents any rolling away at the workplace.
