

## DIGI-WAYET DUAL-BAY DOCKING STATION

## [INFINITE CONNECTIONS]

## NEW

NEW! The Digi-Wave Dock offers an innovative extension to the Digi-Wave two-way wireless communication system from Williams Sound. It provides a simple, flexible way to connect portable Digi-Wave systems to other fixed systems. The connection begins when a Digi-Wave transceiver or receiver is simply plugged into the Dock. The Dock provides continuous power and/or charging for two Digi-Wave devices, and has separate audio inputs and outputs in each of its bays.

### How it Works:

- --Place a DLT 100 2.0 transceiver into the Digi-Wave Dock and easily bring audio from an outside source to listeners using a Digi-Wave system.
- --Place a DLT 100 2.0 transceiver or DLR 60 2.0 receiver into the Dock to deliver audio from a portable Digi-Wave system to listeners in a permanent sound installation.

# DIGI-WAYETM DUAL-BAY DOCKING STATION

### **FEATURES**

- Easy access to all sound systems
- Separate inputs and outputs in each bay
- RCA or XLR input/output option
- Charges DLT 100 2.0 transceivers and DLR 60 2.0 receivers
- Clean, streamlined design
- Can utilize balanced or unbalanced line-level audio
- Made in the USA
- 2 Year Warranty (90 days on accessories)

## **DWD 102 INCLUDES**

- (1) DWD 102 Charger/Docking Station
- (1) TFP 048 Power Supply

## **APPLICATIONS**

- Digi-Wave can be used as a presentation system, permitting multiple presenters, without the need for a mixer or multiple wireless microphones.
- Digi-Wave can be added as a wireless connection to teleconferencing or wired intercom systems.
- Allow an easy connection and powering of individual interpreter transmitters when the Digi-Wave is used in the language interpretation mode.
- Other applications are only limited by the imagination.

Note: The Digi-Dock is approved by the FCC for operation in U.S. markets. The Digi-Dock cannot be used in all countries. Check with your government's radio regulations for 2.4 GHz operation.
