

SPECIFICATION:

8500R-Bio-Shear® Flush Cutter - Right Hand Model

Bio-Shear® flush cutters incorporate the popular curved grip design with all the ergonomic features of our standard 170-II Micro-Shear® Flush Cutter.

Grip design keeps the knuckles of the operator's hand in a straighter line and prevents the hand from completely closing, reducing the amount of effort expended while delaying fatigue.

Heat treated to 54-56 RC for lasting durability.

Comes in either right (Model 8500R) or left (8500L) handed configurations.

Rated for cutting soft wire up to 18 AWG (1.02 mm).
