OPERATION

Bolt plate onto stand with (4) screws.

Install 9 volt battery into rear compartment of tester.

Velcro tester onto test station stand.

Connect wire into bottom of tester through access holes in stand.

Plug other end of wire into fitting on bottom of plate.

With heel grounders on both feet, step onto plates and press touch plate.

When testing wrist straps, plug banana jack into front of tester. Switch to "wrist strap" setting and push touch plate.
