

Grow Stool™ Seat Pad

Model No: 59073

OVERVIEW:

The Grow Stool Seat Pad easily enhances any Height Adjustable Grow Stool by adding comfort to a design already promoting improved posture and increased focus.

SEAT PAD:

The seat cushion itself is made of 100% polyurethane and is textured to prevent slipping. The cushion is fused to a rigid ABS contact plate. The inside seam between cushion and contact plate is covered by a polypropelene snap ring which attaches to contact plate with six M4 x 8mm flat head screws. This ring enables pad to press fit onto Grow Stool Seat. Pad adds 1" to height of Grow Stool and 1.5" to seat diameter. Seat Pad is compatible with both short and tall Grow Stools: 50960 and 50970.
