# Activity Tables

## OVERVIEW:

The wide variety of shape and size options offered by the Activity Tables provide flexibility and fit to any classroom.

## TOPS:

The top is made of 1 1/8" Particleboard Core with 3mm Flat Vinyl T-Mold Edge. The work surface is constructed of 45# particleboard core with high-pressure laminate (HPL) top surface and phenolic backer sheet for balanced construction. 1 1/8" 3mm flat vinyl t-mold is secured to the work surface with brad nails along the perimeter.  Stretcher bars are standard on tops 60" long and longer.

## LEG:

Adjustment range is from 21"–30" in 1" increments. Two M6 x 13MM truss head screws with Philips drives are used to tighten the leg at the chosen height. Legs are constructed of a 30mm diameter 18-gauge powder coat upper leg receiver and 27mm 16-gauge chrome plated lower leg insert with standard inserted swivel nylon glide. The leg receiver is welded to a 12 gauge steel top plate and has a 1-gauge (AWG) wire for additional strength. Each leg is fastened to the table by six (6) #10 x 1" truss head Philips drive sheet metal screws. Optional youth height inserts reduce the height range by 6", bringing the range to 15"-24".

## OPTIONS / ACCESSORIES:

All Activity Table tops are available with a variety of laminate and edgeband options, as well as black or platinum legs.

Optional accesories include a youth height leg insert, enclosed book box, ganging device, and clamp mounted electrical unit.
