

Make any recent LCD display interactive with eBeam Edge and the Edge LCD Bracket

The eBeam Experience on your LCD Display

The eBeam Edge LCD Bracket expands on all the benefits of eBeam Edge and eBeam software by giving schools and businesses using LCD displays, even more flexibility. Attach the bracket to the top of your display, place the eBeam Edge in the bracket, connect your computer to the display and use the award-winning eBeam software tools to enhance and improve presentations and lesson delivery.

Benefits

- Go from static to dynamic when you retrofit an existing LCD TV with an eBeam Edge. Using the LCD Bracket is the most cost effective way to create an interactive display.
- Choose your model, choose your size. The eBeam Edge LCD Bracket is compatible with displays from 40" (100 cm) to 80" (200 cm).
- Bring interactivity to every environment – the bracket with the Edge is small, light and ultra portable so you can set up an interactive display in minutes.
- Provide a unified experience for end-users. Intuitive eBeam software tools are optimized for use on projected surfaces and displays. Users in environments with eBeam products on different surfaces achieve comfort and capabilities from the get go.
