Chapter 1: Product Introduction

Thank you for choosing the I3ALLSYNC Wireless Presentation Receiver System software.

1-1 Introduction

This I3ALLSYNC User Reference Guide provides a summary of how I3ALLSYNC works for users, including an overview of an I3ALLSYNC system as well as steps for users to connect, share and control content on an I3ALLSYNC wireless display using laptops, mobile devices and the display user interface. I3ALLSYNC will improve meeting room efficiency, engagement, and productivity.

Key Features

- (1) Connect with Windows, Mac, iOS and Android devices
- (2) Screen mirroring the desktop, and apps, docs, images & videos file streaming
- (3) Stream 1080p at 30fps or better with synchronized audio
- (4) See changes on display in real time
- (5) Display-side control with multi-touch support
- (6) Share from multiple iPads and iPhones simultaneously
- (7) Support 4 split screens mirroring.
- (8) Multiple use models supported: Basic Mode Access; Conference Mode Access ·

1-2 Hardware Recommendation

I3ALLSYNC Client/User Device – Technical Requirements

Clients – laptops ar	Clients – laptops and mobile devices		
	Laptops & Tablet PCs	iPads, iPhones,&	Android Tablets &
		iPods	Phones
Operating System	Windows 7 or newer	iOS version 7.0 or	Android 5.0 or newer
	OSX 10.10 or newer	newer	
Minimum	Intel Core 2 Duo, 2.3GHz	iPad 3 / iPhone 5 or	Phones/Tablets with
Required	2 GB RAM	newer	Android 5.0 or newer
Recommended	Intel Core i5 with 2C4T,	iPad 3 / iPhone 5 or	Phone/Tablets
	2.3GHz 6 GB RAM	newer	supporting Android
			5.0 or newer

I3ALLSYNC Share Windows Software (server) – Technical Requirements

Host Compute	r for I <mark>3ALLSYNC</mark> V	Vindows Software		
Operating	Windows 7, 8.1 or 10			
System	I3ALLSYNC Windows Software is not supported in a virtual machine (VM)			
System	environment o	nment or while using terminal services.		
	Processor	Intel Core i5 with 2C4T 2.3GHz or higher, or AMD equivalent.		
D.dite interview	Graphics	Direct X 11 or higher, Integrated Intel HD Graphics or Dedicated		
Ninimum		Graphics (i.e. AMD Radeon or NVIDIA GeForce)		
Required	RAM	4 GB		
	Network	Single NIC Card. Ethernet Connection		

I3ALLSYNC Share Network Requirements

Network and Internet Access

When I3ALLSYNC is deployed into the existing network, the host PC and the clients require wired or wireless network connection with a minimum bandwidth of 20 Mbps. When running HD content, increase the minimum bandwidth to 50 Mbps. Like any network application, the overall performance would be depended on available bandwidth. Internet access is required to activate the I3ALLSYNC Windows Software (server) and install software updates for I3ALLSYNC Windows Software (server). Internet access is also required to install and update the I3ALLSYNC client apps for Windows, Mac, iOS, and Android.

Chapter 2: Description of Functions

When you see the screen below, the I3ALLSYNC server is ready for connection.

Receiver:

Receiver	ICON	Description
I3ALLSYNC (for Windows)		The receiver server which receives and shows the shared screens from the transmitters.

Transmitters (Sender Clients):

Transmitter	ICON	Description
I3ALLSYNC (Windows)	۲	The software shares the screen from PC or tablet to the receiver.
I3ALLSYNC (Mac)		The software shares the screen from Mac to the receiver.
I3ALLSYNC Sender (Android)		The app mirrors the screen from phone or tablet to the receiver.

2-1 Using I3ALLSYNC

Step2. Connect the Windows Platform to a dedicated router via LAN of Wi-Fi.

Step3. Launch the I3ALLSYNC

Step4. Allow access through the Windows Firewall.

Now the I3ALLSYNC Share server is ready for connection.

2-2 I3ALLSYNC User Interface

Item	Description
Receiver Name	It will be identical to the Windows Computer Name.
IP Address	Received from another DHCP Server or configured manually to server.
Connect To	Show the upper AP router SSID via Wi-Fi connection.
	Show "LAN" via LAN connection.
LoginCode	4 digits to ensure client connect to the correct receiver server.
Software Download	Web link to download I3ALLSYNC Client Software and user guide
Action Short Cut	The control panel and main functions of I3ALLSYNC.

2-2-1 Action Short Cut (Control Panel)

Item	Description
	Enable / Disable the Conference Mode from receiver server.
	Show clients' screens preview on left or right bar in conference mode.
TO NOT	Enable/Disable Back Control from receiver to control the Windows / Mac clients.
ţţţ	Go to the settings window of I3ALLSYNC receiver server.
ŀ	Stop all mirroring screens on the receiver.
Z	Annotator, drawing on the screen and save to file.
	Minimize I3ALLSYNC to the Windows Task bar. Close I3ALLSYNC.

2-2-2 Basic Mode and Conference Mode

Basic Mode

All the clients with I3ALLSYNC transmitter software or app are free to share their screens once their devices are connected to the I3ALLSYNC receiver server. The clients can share one after another in full screen or in split-screen.

Conference Mode

A meeting control system that enables the meeting host as admin to organize the connected devices and select which screen to share and stop. If the admin doesn't choose the client which may not share the screen. Admin have the initiative to manage the shared screens.

2-2-3 Multi-screens (Windows Receiver only feature)

The user guide for client's transmitter device to connect to I3ALLSYNC receiver will be stated in Chapter 3 of this manual.

i3ALLSYNC Share supports multi-screens sharing feature:

(Streaming performance of multi-screens depends on CPU and GPU of hardware platform.)

View the Sharing Screens

When multiple screens are sharing, select the sharing screen, Zoom In and Close buttons appear on the screen. When some on is sharing in full screen, move the mouse cursor or swipe on the touch panel from bottom to the edge, Zoom Out button shows up.

i3ALLSYNC

• •

The clients can share on the split screens, up to 4 screens. If Basic Mode Overwrite is On, the fifth screen will overwrite the earliest one. If Basic Mode Overwrite is Off, the fifth screen will not be showed on the I3ALLSYNCReceiver output until one of the previous screen stop sharing.

Multi-screens in Conference Mode:

The meeting host as an admin who can select which screen to share and join in the split screens. Click to let the screen preview bar show up. Or move the mouse cursor or swipe on the touch panel

from the left/right side to edge.

Select the client's screen, the Play/Stop button appears.

Press "Play" to let the client shows full screen or join in the split screens. Press "Stop" to

2-2-4 Back Channel Control

Back Channel Control feature enables the I3ALLSYNC receiver to interact with the I3ALLSYNC client. Make a click on I3ALLSYNC receiver, I3ALLSYNC will do a same click on the client's device.

Click to enable/disable Back Control from receiver to control the Windows/Mac client. Back Channel Control only works when Windows/Mac client is in full screen mirroring.

2-2-5 I3ALLSYNC OSD Information

During mirroring, move the mouse cursor or swipe on the touch panel from bottom to the edge, the system will show up the OSD connection information.

Click V to open annotator. The annotator will show on the left side of screen.

2-2-7 I3ALLSYNC Share Settings

Evpire Op	Trial Version = Expired Day of trial.
Expire On	Activated Version = Expired Day of OTA update effective.

Hardware DecodeOFF = Disable GPU hardware acceleration.ON = Enable if the platform supports GPU hardware acceleration.

Chapter 3: I3ALLSYNC Transmitter Software and Applications

3-1 I3ALLSYNC Windows Transmitter Software

3-1-1 Install I3ALLSYNC Windows software

You can install I3ALLSYNC application. Go through the steps to complete the software installation.

3-1-2 Launch I3ALLSYNC Windows software

Step 1. Launch the I3ALLSYNC software, the pairing wizard window shows up.

Step 2. Pairing the I3ALLSYNC and I3ALLSYNC.

I3ALLSYNC client should connect to the same network with the I3ALLSYNC receiver. You can refer to the information on standby screen of I3ALLSYNC receiver.

Depending on the connection status, 3 types of pairing method.

	Client connects to the router via Wi-Fi
туре А	I3ALLSYNC connects to the router via Wi-Fi or LAN
	Client connects to the router via LAN
туре в	I3ALLSYNC connects to the router via LAN or Wi-Fi
Tupo C	Using HotSpot of the receiver device platform. (Need dedicated Wi-Fi module)
Type C	Client connects to I3ALLSYNC via Wi-Fi HotSpot of the receiver device directly.

General Pairing Steps

When client's device is already connected to the same network with the receiver device. I3ALLSYNC software can find the receiver device.

- 1. Select the correct receiver device which you are going share screen.
- 2. Input the Login Code. Press "Play" to start sharing screen.

If you cannot find the device directly, here are some guides for different pairing methods.

Type A: Client connects to the router via Wi-Fi

1. Select the WiFi router and click the "Select" button. The right pane will expand.

- 2. Input the Wi-Fi password of the router and click "OK".
- 3. Select the correct receiver device which you are going share screen.
- 4. Input the Login Code. Press "Play" to start sharing screen.

Item	Description
	Device/AP Around You. Select the router you want to connect to. The I3ALLSYNC
5	receiver should be located behind this router.
Q	Find the receiver by IP.
C	Refresh the list if the Wi-Fi router or device if it doesn't appear.
Î	Select the saved pairing record and discard it.
Select	Choose the router, click "Select" to connect.
Wi-Fi	Input the Wi-Fi password you set in Soft AP mode
Password	
Device	I3ALLSYNC receiver name will be located and shown here.
Under AP	
Login Code	In put the Login Code if you see it on I3ALLSYNC receiver.
Save	Save the pairing record in the client PC.
Play	Start the screen mirroring.

Type B. Client connects to the router via LAN

- 1. Select the correct receiver device which you are going share screen.
- 2. Input the Login Code. Press "Play" to start sharing screen.

*Because the client PC connects to the router via LAN cable, no pairing record to save.

Type C. Using HotSpot of the receiver device platform (Soft AP mode)

- 1. Select the WiFi router and click the "Select" button. The right pane will expand.
- 2. Input the Wi-Fi password of the router and click "OK".
- 3. Select the correct receiver device which you are going share screen.
- 4. Input the Login Code. Press "Play" to start sharing screen.

Client's Panel

"Play" button is not available in Conference mode if Admin doesn't allow the client to share screen. Admin have the initiative to manage the clients to shared screens.

Manage Multi-Screens Mirroring

i3ALLSYNC Share supports 4 split-screen mirroring function. Admin can use i3ALLSYNC Conference Mode panel to manage max 4 clients mirroring on the i3ALLSYNC receiver.

- 1. Select a client and press Play button to share the client's screen.
- 2. Add other clients to join in split screen.
- 3. Click $\bowtie^{\overrightarrow{n}}$ or $\bowtie^{\overrightarrow{n}}$ to Zoom In/Out the client screen.

lcon	Function Description
7	Zoom In
<u>⊮</u>	If the client is mirroring in split screen, click to zoom it to full screen mirroring.
	Zoom Out
×	If the client is mirroring in full screen, click to zoom out to the original split screen
	size.
-X-	Stop All
	Stop all the mirroring screens, no matter how many split screens are mirroring.
