

VADDIO ConferenceSHOT ePTZ

**ePTZ CAMERA WITH AUTO-FRAMING
TECHNOLOGY**

OVERVIEW

The ConferenceSHOT ePTZ auto-framing camera for videoconferencing makes collaborating easy. Vaddio's ConferenceSHOT ePTZ delivers a dynamic, hands-free video experience that recreates the one-to-one videoconference experience perfect for hybrid working environments. The unique custom settings included with the camera make it ideal for enterprises that want professional-quality video for various meeting room environments.

The ConferenceSHOT ePTZ USB camera has a wide 129° field of view, making it perfect for small collaboration rooms and huddle spaces. The built-in microphone is a convenient feature when mounting the ConferenceSHOT ePTZ on mobile display carts or in huddle rooms. Use existing room audio systems with the audio I/O ports located on the bottom of the camera.

When setting up the camera, select one of three primary settings for how sensitive you want the camera auto-framing to be.

Conservative Conference

Designed for low-motion environments, where little tracking action is needed. This mode is perfect for locations with glass walls or near busy walkways with visual background noise.

Responsive Conference

The perfect option when you have teams that utilize the whole room – like collaborating on whiteboards or brainstorming at flipcharts and want their remote colleagues to stay right with the action. This mode quickly adjusts the image to include people entering and exiting the meeting space.

Default Conference

The sweet spot where most teams are happy with the system performance.

The camera comes with a wall mount that allows the camera to tilt up and down ensuring proper framing of the conference table. The camera has a USB 3.0 Type C port, HDMI and audio I/O to easily integrate with existing room audio systems. The camera also has built-in RTSP and RTMP streaming capabilities for one-button streaming to popular services like YouTube, Facebook, Twitch, Vimeo and more.

The ConferenceSHOT ePTZ auto-framing camera is a simple plug-and-play video and audio peripheral with popular conferencing clients like Microsoft Teams, Zoom, and Google Meet. AV and IT managers love the option of customizing camera performance for different environments and meeting types, mass firmware updates, video stream preview for troubleshooting, and free local technical support without any service contracts.

FEATURES

- Advanced Intelligent Framing algorithms keep your participants in view
- 5x zoom with a 129° horizontal field of view
- Simultaneous USB 3.0, HDMI and H.264 IP Streaming (RTSP or RTMP)
- Integrated omnidirectional microphone with built-in Acoustic Echo Cancellation (AEC)
