> INTRODUCING: 9440 REMOTE AREA LIGHTING SYSTEM

The most innovative **RALS** unit to date, the **9440** moves fast to light up ravines, confined spaces, riverbanks... anyplace generator lights can't go. Deployed in under 10 seconds, the mast extends 7 feet high, shining light over low obstructions encountered by traditional lantern style lights.

With a 120 degree beam spread and up to 2400 lumens, the entire area will have the light you need for a safe and swift operation.

The **9440** is maintenance free and RoHS Compliant, using super tough LED lamp modules and NiMH batteries for up to 6 hours of continuous light.

As fast and easy as 1-2-3.
The 9440 deploys in less than 10 seconds
to a height of 7 ft. (213cm)
