EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

The DPI610E is a portable pressure calibrator with commercial and hazardous area variants. The devices considered for hazardous areas are pressure calibrators for pneumatic and hydraulic processes. The different process mediums are identified in the part numbers as DPI610E-SPC (pneumatic) or DPI610E-SHC (hydraulic).

The pressure range covered by each model are -1 bar to 35 bar for the DPI610E-SPC and 0 bar to 1000 bar for the DPI610E-SHC model.

The electronics is housed within a PC/ABS enclosure with an overmould to help protect the equipment enclosure from damage. A glass touchscreen display is provided for display of data and parameter control. The enclosure is provided with an integral handle for transportation.

The equipment is provided with a pressure port to allow connection to the device under test and a manually operated pressure release port. The DPI610E-SPC has an additional port for a barometric sensor and the DPI610E-SHC has a port for connection of a fluid reservoir.

The DPI610E-SPC has a manually operated pump and a fine adjust for the generation and control of pressure. The DPI610E-SHC has a priming pump to facilitate bleeding of the pressure system and a pressure intensifier to generate the pressure.

The equipment is powered by a rechargeable battery pack that is to be charged only in safe areas. A button activated battery indicator is provided that, when depressed, lights several LED's that give an indication of the battery level. The charging socket rating of either $U_m = 18V$ or $U_m = 30V$ is marked on the equipment.

The USB connector is rated $U_m = 250V$ and is for use only in safe areas.

Continued on Page 4.

SPECIFIC CONDITIONS OF USE: YES as shown below:

1. The equipment must be charged in a non-hazardous area with an ambient temperature of $0^{\circ}C \leq T_{amb} \leq +45^{\circ}C$.
2. The RS485 connection must only be connected to certified passive accessories i.e. power derived from the DPI610E-IS only.
3. The USB connection is only for use in a non-hazardous area.
4. Where an alternative internal pressure sensor is used it must be a certified device and installed in accordance with the terminal parameters and any conditions of safe use applied to them.
5. Where a remote sensor is connected to Channel 2, the remote sensor must be disconnected from all other power sources.
