

## Focus on Hospitals and Healthcare

The modern healthcare laboratory strives to meet ever increasing demands. The pressure to complete testing and screening quickly and accurately is relentless, which is where Bibby Scientific can help. Bibby Scientific is a market-leading manufacturer of benchtop science equipment, from some of the industry's best known brands. Our products are:

- Paraffin Wax Dispenser
- Paraffin Section Mounting Bath
- Slide Drying Bench
- Analogue and Digital Tube Roller range
- Wide Rotator range
- Homogenisers

## Paraffin Wax dispenser

Designed to make routine tissue embedding easy and mess free. Key features include:

- Heated tap to prevent wax solidification
- PTFE lining to make it virtually maintenance free
- Added safety feature which warns if the wax temperature is above the set temperature

## Slide Drying Bench

For drying of sectioned tissue samples.

- Up to 50 slides capacity
- Suitable for different orientations
- Built-in energy regulator controlling temperature up to 100°C
- Replacement elements easy fitted by user

## Homogeniser

Homogenisation is very common sample preparation step prior to analysis of nucleic acids, proteins, cells, metabolism, pathogens, and many other targets.

- Powerful variable speed homogenisers
- Range of probes to suit any type of sample

## Paraffin Section Flotation Bath

Allows quick and clean sample mounting after microtome sectioning

- Black PTFE interior gives high contrast for viewing specimens
- Improved temperature stability
- More rapid heat up times

## Rollers

- A roller mixer is ideal for a gentle mixing action.
- Recommended for mixing blood samples, viscous substances and liquid-solid suspensions where minimum aeration is required

## Rotators

- Ideal for keeping biological samples in suspension, aerating cultures and general mixing applications.
- Variety of tube holders available
