

# T33 SERIES TIPS

The **T33 Standard Tips** are cross compatible to use with the FX-8004 handpiece. These tips feature 260W composite ceramic heating elements. These heating elements have a top controlled temperature of 940 °F / 500 °C and high mass shapes, enabling you to solder some of the most challenging solder joints at only 750 °F / 400 °C and without preheating!

The **T33 Slim Tips** are thinner tips that can be used for narrow spaces but maintains the same amount of heat as the standard tip.

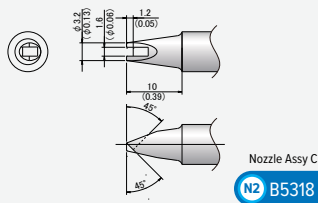

## T33 SERIES TIPS FOR USE WITH FX-8004
