INSTRUCTION MANUAL

DT70

Protective Cover
for DT530

Cover Replacement

Hold down the tool with one hand onto the stand (1) and grasp the suction hose at the point where it meets the protective cover and pull upwards (2) to undock the solder-collector group from the heating element.

 Be careful when manipulating the tool. The metal and glass parts may be hot.

www.jbctools.com

Remove the suction hose from the nozzle of the hose connector. Remove the protective cover by pulling it out and replace it with the new one. Place the new protective cover onto the nozzle of the hose connector and then connect again the suction hose to the hose connector (and to the solder collector group, if disassembled).

Reassemble the whole solder-collector group onto the desoldering tool.
