Filter Replacement

1. Sliding down the side tabs and open the front lid.

2. Remove the worn filter by pulling it upwards out of the snap-fits.

3. Position the new filter with its clear side upwards and with the cross-shaped strud at the left side.

Cross-shaped strud

4. Center the filter between the snap-fits and push it in.

5. Push the positioned filter back until it stops against the transparent ribs.

6. Close* the front lid by pressing against its both upper corners until it clicks.
