# FieldFox Handheld Analyzers

4/6.5/9/14/18/26.5/32/44/50/54 GHz

### Introduction

This configuration guide describes configurations, options, and accessories for the FieldFox B-Series family of portable analyzers. Use this guide, along with the technical overview and data sheet, for a complete description of the analyzers. The table on page 3 titled "FieldFox B-Series Family and Options" shows a comparison of the functions available in the FieldFox B-Series family of analyzers.

Note: Combination analyzer (combo) = Cable and antenna tester (CAT) + Vector network analyzer (VNA) + Signal analyzer (SA).

#### Included accessories

The following accessories are included with every FieldFox:

- AC/DC adapter
- Battery
- · Soft carrying case
- LAN cable

- 1. Base model functionality listed is the primary function of that instrument. For example, on the N991x/5xB combo analyzers, cable and antenna analyzer is the standard function included with every N991x/5xB.
- 2. Option 305 is not available on the N993x/6xB. A subset of measurements, return loss and VSWR, is available as Option 320.
- 3. Option 320 is not applicable to N991x/5xB. The N991x/5xB includes reflection measurements of return loss and VSWR as standard functions.
- 4. On the N991x/5xB analyzers, order Options 233 and 210 to obtain a tracking generator with the spectrum analyzer. There is no Option 220 on the N991x/5xB analyzers. Option 233 provides the spectrum analyzer capability and Option 210 the "tracking" capability.
- 5. 10 MHz standard.
- 6. Models N9913/33B, N9914/34B and N9915/35B do not support frequency extenders. This is because the mixers' starting LO frequency is higher than 9 GHz and the FieldFox Port 1 provides the LO to the mixer. For a list of supported OML frequency extenders, see Accessories pages 19-20.

# FieldFox RF and Microwave (Combination) Analyzers

## **Analyzer models**

Step 1. Select the model that provides the desired frequency range.

| Model  | Description                          | CAT and VNA<br>frequency | SA frequency <sup>1</sup> | Test port connectors |
|--------|--------------------------------------|--------------------------|---------------------------|----------------------|
| N9913B | 4 GHz FieldFox RF analyzer           | 30 kHz to 4 GHz          | 9 kHz to 4 GHz            | Type-N (f)           |
| N9914B | 6.5 GHz FieldFox RF analyzer         | 30 kHz to 6.5 GHz        | 9 kHz to 6.5 GHz          | Type-N (f)           |
| N9915B | 9 GHz FieldFox microwave analyzer    | 30 kHz to 9 GHz          | 9 kHz to 9 GHz            | Type-N (f)           |
| N9916B | 14 GHz FieldFox microwave analyzer   | 30 kHz to 14 GHz         | 9 kHz to 14 GHz           | Type-N (f)           |
| N9917B | 18 GHz FieldFox microwave analyzer   | 30 kHz to 18 GHz         | 9 kHz to 18 GHz           | Type-N (f)           |
| N9918B | 26.5 GHz FieldFox microwave analyzer | 30 kHz to 26.5 GHz       | 9 kHz to 26.5 GHz         | 3.5 mm (m)           |
| N9950B | 32 GHz FieldFox microwave analyzer   | 300 kHz to 32 GHz        | 9 kHz to 32 GHz           | 2.4 mm (m)           |
| N9951B | 44 GHz FieldFox microwave analyzer   | 300 kHz to 44 GHz        | 9 kHz to 44 GHz           | 2.4 mm (m)           |
| N9952B | 50 GHz FieldFox microwave analyzer   | 300 kHz to 50 GHz        | 9 kHz to 50 GHz           | 2.4 mm (m)           |
| N9953B | 54 GHz FieldFox microwave analyzer   | 300 kHz to 54 GHz        | 9 kHz to 54 GHz           | 1.8 mm (m)           |

<sup>1.</sup> Useable to 5 kHz.

## **Analyzer Options**

### Step 2. Select optional measurement capabilities.

Any of these options can easily be added as a software upgrade in the future.

| Option    | Description                                 | Prerequisite options/notes                                                                                                             |  |
|-----------|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|--|
| CAT/vecto | or network analysis                         |                                                                                                                                        |  |
| 010       | VNA time domain                             | Requires 210, recommend 211. See FAQ #7                                                                                                |  |
| 210       | VNA transmission/reflection                 | Recommend ordering a calibration kit. See FAQ #4 and FAQ #6                                                                            |  |
| 211       | VNA full 2-port S-parameters                | Requires 210, recommend ordering a calibration kit. See FAQ #5                                                                         |  |
| 212       | 1-port mixed-mode S-parameters              | Requires 210 and 211                                                                                                                   |  |
| 215       | TDR cable measurements                      | _                                                                                                                                      |  |
| 308       | Vector voltmeter                            | 210 and 211 required for full VVM functionality. See FAQ #8                                                                            |  |
| Spectrum  | analysis                                    |                                                                                                                                        |  |
| 209       | Extended range transmission analysis (ERTA) | Requires 233 and 210. Recommend 307. Requires two FieldFox units. See FAQ # 9. See page 9 for typical configuration.                   |  |
| 233       | Spectrum analyzer                           | -                                                                                                                                      |  |
| 235       | Pre-amplifier                               | Requires 233                                                                                                                           |  |
| 236       | Interference analyzer and spectrogram       | Requires 233                                                                                                                           |  |
| 238       | Spectrum analyzer time gating               | Requires 233                                                                                                                           |  |
| 312       | Channel scanner                             | Requires 233. Require the corresponding option to support a specific app. For example, to support EMF in channel scanner requires 358. |  |
| 350       | Real-time spectrum analyzer (RTSA)          | Requires 233, Recommend 235. See FAQ # 11                                                                                              |  |
| 351       | I/Q Analyzer (IQA)                          | Requires 233                                                                                                                           |  |
| 352       | Indoor and outdoor mapping                  | Requires 233, 307, and at least one of 312, 360, 370, 371, 377 or 378. See FAQ #15                                                     |  |
| 353       | IQ streaming                                | Requires 233 and 351                                                                                                                   |  |
| 355       | Analog demodulation                         | Requires 233                                                                                                                           |  |

| Option     | Description                              | Prerequisite options/notes                                                                                                                                                                   |
|------------|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 356        | Noise Figure (NF)                        | Requires 233, 235, 309 and accessory item N9910X-713 BNC to SMB cable. See FAQ #13 for external preamplifier and noise source requirements.                                                  |
| 358        | EMF measurements                         | Requires 233. Also requires triaxial antenna. See FAQ #16                                                                                                                                    |
| 360        | Phased array antenna support             | Requires 233. Also requires phased array antenna. N991x/3xB (x > 5) models require external mixer. No external mixer required for N995x/6xB models. See FAQ #14                              |
| 361        | EMI measurements                         | Requires 233                                                                                                                                                                                 |
| 370        | Over-the-air (OTA) LTE FDD               | Requires 233 and 307. Recommend 235.                                                                                                                                                         |
| 371        | Over-the-air (OTA) LTE TDD               | Requires 233 and 307. Recommend 235.                                                                                                                                                         |
| 377        | Over-the-air (OTA) 5G TF                 | Requires 233 and 307. Recommend 235. N991x/3xB (x > 5) models require external mixer. See FAQ #14 No external mixer required for N995x/6xB models. 5G TF is pre-5G standard                  |
| 378        | Over-the-air (OTA) 5G NR                 | Requires 233, B10, and 307. Recommend 235. N991x/3xB (x > 5) models require external mixer for FR2 frequencies above 26.5 GHz. See FAQ #18. No external mixer required for N995x/6xB models. |
| B04        | Analysis bandwidth, 40 MHz <sup>1</sup>  | Requires 233. Recommend 350, 351 or PathWave VSA (formerly 89600 VSA) software                                                                                                               |
| B10        | Analysis bandwidth, 120 MHz <sup>1</sup> | Requires 233. Recommend 350, 351, 378 or PathWave VSA (formerly 89600 VSA) software.                                                                                                         |
| Power mea  | surements                                |                                                                                                                                                                                              |
| 208        | USB power sensor meas. versus frequency  | Requires 302 See FAQ I                                                                                                                                                                       |
| 302        | USB power sensor support                 | Need to order USB power sensor <sup>2</sup> See FAQ A                                                                                                                                        |
| 310        | Built-in power meter                     | No power sensor required. See FAQ B                                                                                                                                                          |
| 330        | Pulse meas. with USB peak power sensor   | Requires 302 and USB peak power sensor. See FAQ G and FAQ H                                                                                                                                  |

# FieldFox RF and Microwave (Combination) Analyzer FAQs

| Question                                                | Answer                                                                                                                                     |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | The base model includes the cable and antenna analyzer                                                                                     |
| A AMbout to took all all all all all all all all all al | Measurements: DTF (dB, linear, VSWR), return loss and DTF, return loss (dB), and 1-port cable loss                                         |
| What is included with a base                            | Calibrations: CalReady, OSL, and response calibration                                                                                      |
| N991x/5xB analyzer?                                     | Note: 2-port insertion loss is NOT included with the base model, if 2-port insertion loss is needed, order Option 210                      |
|                                                         | Note: Base analyzer does not have phase information, for S11 or S21 phase, order Option 210                                                |
|                                                         | Basic spectrum analysis, four traces, different detector types, radio standard selection, limit lines                                      |
|                                                         | Channel power, occupied bandwidth, adjacent channel power, spectrum emission mask                                                          |
| 2. What is included with N991x/5xB                      | AM/FM tune and listen, field strength measurements, antenna factors, frequency counter marker                                              |
| Option 233?                                             | Tracking generator (TG)/Independent source:                                                                                                |
| ·                                                       | TG CW mode (source CW frequency can be set independent of SA frequency) - included                                                         |
|                                                         | TG CW coupled mode (source CW frequency is auto coupled to SA's center frequency) - included                                               |
|                                                         | <ul> <li>TG tracking mode (traditional TG operation, swept SA coupled to swept source) - (requires Option 210)</li> </ul>                  |
| 3. What is included with N991x/5xB Option 236?          | Interference analyzer and spectrogram, trace playback and recording                                                                        |
|                                                         | Option 210 adds a VNA with transmission/reflection (T/R) capability                                                                        |
|                                                         | Measurements: S21, S11, magnitude and phase                                                                                                |
|                                                         | Additionally, in the CAT mode, you can measure 2-port insertion loss                                                                       |
| 4. What is included with N991x/5xB                      | Calibrations: CalReady, OSL, response, and enhanced response cal                                                                           |
| Option 210?                                             | If you need all four S-parameters, order Options 210 and 211                                                                               |
|                                                         | If you need 2-port cal, order Options 210 and 211                                                                                          |
|                                                         |                                                                                                                                            |
|                                                         | Adds tracking mode to the tracking generator/independent source included with Option 233, spectrum analyzer                                |
| 5. What is included with N991x/5xB                      | Option 211 adds full 2-port S-parameter capability to the VNA mode                                                                         |
| Option 211?                                             | Measurements: All four S-parameters (S11, S21, S22, S12), magnitude and phase                                                              |
| <u> </u>                                                | Calibrations: CalReady, OSL, response, enhanced response, and full 2-port calibration                                                      |
| 6. Can I measure group delay on                         | If you have phase measurement capability, then you can measure group delay. Option 210 is required for any phase                           |
| N991x/5xB analyzers?                                    | measurement capability. So, if you do not have Option 210, you cannot measure group delay.                                                 |
|                                                         | S11/S21 in time domain, if Option 210 is ordered. To get time domain data for all four S-parameters and full 2-port cal, order Option 211. |
| 7. What is included with N991x/5xB                      | View both time and frequency domain data at the same time                                                                                  |
| Option 010?                                             | Low-pass, impulse, and band-pass modes                                                                                                     |
|                                                         | Minimum, medium, and maximum window                                                                                                        |
|                                                         | Gating                                                                                                                                     |
|                                                         | With Option 308: 1-port cable trimming                                                                                                     |
| 8. What is included with N991x/5xB                      | With Options 308 and 210: 1-port cable trimming, 2-port transmission                                                                       |
| Option 308?                                             | With Options 308, 210, and 211: 1-port cable trimming, 2-port transmission, A/B and B/A                                                    |
|                                                         | Note: A/B and B/A measurements require an external source                                                                                  |
|                                                         | Extended Range Transmission Analysis (ERTA) or Option 209 is a scalar measurement system based on the use of                               |
|                                                         | two (2) FieldFox units. One FieldFox acts as the source and reference receiver, while the second FieldFox acts as the                      |
|                                                         | measurement receiver. When different frequency models are used in an ERTA pair, the system frequency range is                              |
|                                                         | limited to the lowest of the pair.                                                                                                         |
|                                                         | Required hardware                                                                                                                          |
|                                                         | A. Two (2) FieldFox units. FieldFox units can be any of these models:                                                                      |
|                                                         | FieldFox combination analyzers: N9913/14/15/16/17/18/50/51/52/53B                                                                          |
|                                                         | <ul> <li>FieldFox signal analyzers: N9933/34/35/36/37/38/60/61/62/63B</li> </ul>                                                           |
| 9. What are the requirements for                        | The two FieldFox units used in ERTA do not have to be the same model.                                                                      |
| Option 209?                                             | ERTA requires the following options on Combo FieldFox models (N9913/14/15/16/17/18/50/51/52/53B):                                          |
| •                                                       | Option 210, VNA transmission/reflection                                                                                                    |
|                                                         | Option 233, spectrum analyzer                                                                                                              |
|                                                         | ERTA requires the following options on SA FieldFox models (N9933/34/35/36/37/38/60/61/62/63B)                                              |
|                                                         | Option 220, tracking generator                                                                                                             |
|                                                         | Both FieldFox units (the one used as the source, and the other used as the receiver) must have the options listed                          |
|                                                         | above. The ERTA option (209) cannot be installed unless 210 and 233 are present on a combo analyzer; or 220 is                             |
|                                                         | present on a SA analyzer.                                                                                                                  |
|                                                         | With either the Combo or SA FieldFox units, the following options are highly recommended:                                                  |
|                                                         | which did is the Combo of SA Field ox drills, the following options are nightly recommended.                                               |

| 10. | What is included with Option 355?                                                                                      | FieldFox analog demodulation has two parts: (1) Tune and listen, with the purchase of the spectrum analyzer option 233. AM/FM m purchased. AM/FM metrics provides the user with RF spectrum vi power, frequency deviation, SINAD and more.                                                                                                                                                                                                                                                                                                                    | etrics becomes available when Optic                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | n 355 is                                                                                                 |  |
| 11. | What is included with Option 350?                                                                                      | Real-time spectrum analyzer (RTSA) or Option 350 provides real-time measurements on a FieldFox. The FieldFox must be equipped with spectrum analysis capability. The preamplifier option is recommended, as elusive signals often have low power levels. The maximum real-time bandwidth for option 350 is 10 MHz. RTSA includes trace recording                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                          |  |

#### Question

#### Answer

 What is required for 5G NR over- the-air (OTA) measurements (Option 378)? Requires spectrum analyzer mode (Option 233 on combination models), 120 MHz analysis bandwidth (Option B10) and GPS receiver (Option 307). Highly recommend internal preamplifier (Option 235). FR2 frequencies above 26.5 GHz will require external mixer for N991x/3xB (x>5) models. N995x/6xB models eliminate the external mixer requirements. For Keysight direct sales, mixer is orderable as Keysight model N9910XM28-H2A for 3.5 mm test ports or N99010xM28-H2N for type N test ports. For indirect sales, the mixer is orderable as OML Inc. model M28H2ADC-K, please see website <a href="https://www.omlinc.com">www.omlinc.com</a> for more information or contact a Keysight representative. OML mixer RF input interface is 2.92 mm (f). See Pages 19-20 "Accessories" section for other supported OML mixers and OML frequency extender module adapter kits.

| RF input frequency range                                                    | 24 to 40 GHz    |                                  |  |
| IF output frequency range                                                   | 0.3 to 6.5 GHz  |                                  |  |
| LO harmonic number                                                          | 2               |                                  |  |
| LO input frequency range                                                    | 12 to 20 GHz    |                                  |  |
| LO input power                                                              | -18 to -5 dBm   |                                  |  |
| Conversion factor IF = 1 GHz                                                | 10 dB (typical) |                                  |  |
| Noise figure                                                                | 12 dB           | (Includes internal IF amplifier) |  |

RTSA trace recordings can be recalled and played back in SA mode Spectrogram. This has the added benefit that the
measurements are shown 'slower', making it easier for the human eye to decipher the signal content.

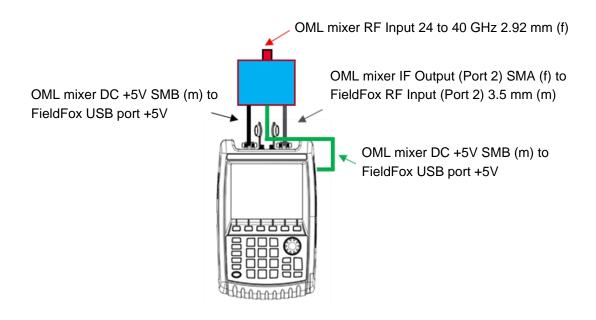

Figure 1. OML external mixer diagram 1

1 This diagram is for OML M28H2ADC-K or Keysight N9910XM28-H2A. In case of Keysight N9910XM28-H2N, the mixer connectors for LO Input and IF Output are both Type-N. See "OML frequency extender modules" and "OML frequency extender module adapter kits" sections on pages 19-20 for further details.

# **ERTA System Typical Configuration**

| Item                           | Description/Options                                                                   | Quantity          |
|--------------------------------|---------------------------------------------------------------------------------------|-------------------|
| FieldFox                       | Combo analyzer: Required Options 210, 233. Recommended: 235, 307                      | 2                 |
| rieidrox                       | SA analyzer: Required: Option 220. Recommended: 235, 307                              | 2                 |
| Power splitter                 | 11667A (Type-N) or 11667B (3.5 mm) or 11667C (2.4 mm)                                 | 1                 |
| Type-N(m) to Type-N(m) adapter | N9910X-850 (for use with 11667A or Type-N systems)                                    | 1                 |
| Trigger cables <sup>1</sup>    | N9910X-712, SMA(m) to BNC(f)                                                          | 2 of each         |
| rrigger cables -               | N9910X-713, SMB(m) to BNC(m)                                                          | Total of 4 cables |
| RF test cable                  | Connecting FieldFox source port 1 to power splitter input                             | 1                 |
| RF test cable or adapter       | Connecting power splitter output arm to FieldFox port 2                               | 1                 |
| RF jumper cable or adapter     | Power splitter output arm to DUT input                                                | 1                 |
| RF jumper cable or adapter     | DUT output to FieldFox receiver port 2                                                | 1                 |
| LAN cable                      | LAN cable to connect two FieldFox units directly, or the analyzers must be on the LAN | 1                 |
| N9910X-825                     | GPS antenna, recommended. Necessary if Option 307 is ordered.                         | 2                 |

<sup>1.</sup> The trigger cables and LAN cables must be at least as long as the separation distance between the two ends of the DUT.

| meter (Option 310)?                                         | Accuracy                                                                                                                                           | Depends on USB sensor                                                                                                | InstAlign accuracy: ± 0.5 dB typical for a CW signal. Since the measurement is within a certain frequency channel or bandwidth, to make an accurate measurement, the user needs to know the exact center frequency and the signal's bandwidth and set those accurately. |  |
|                                                             | Programmable                                                                                                                                       | Yes, via SCPI                                                                                                        | Yes, via SCPI                                                                                                                                                                                                                                                           |  |
|                                                             | Physical connection                                                                                                                                | The power sensor can easily be moved to the measurement point, with a USB cable connecting the detector to FieldFox. | The measurement point needs to be connected to FieldFox's RF input port. If an RF jumper cable is used, the user needs to account for the loss of the cable with an offset value (can be entered into the analyzer).                                                    |  |
|                                                             | FieldFox source control                                                                                                                            | Yes, on/off, and nominal power level control                                                                         | No access to FieldFox's source from the built-in power meter mode                                                                                                                                                                                                       |  |

| Question                                                                                       | Answer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A. What do I need to get     GPS information?                                                  | <ol> <li>The recommended GPS solution is to order:</li> <li>Option 307 - built-in GPS receiver</li> <li>A GPS antenna such as N9910X-825</li> <li>Other GPS antennas can also be used</li> <li>The GPS connector on the instrument is SMA (f)</li> <li>Alternatively, you can purchase a USB-based GPS receiver. You do not need to purchase any FieldFox options for the USB-based GPS to work. However, the USB-based GPS only provides time and location data, and time synchronization capability. It cannot be used to increase the frequency accuracy of the instrument.</li> </ol> |
| B. What is the connector<br>for Option 309, DC<br>output?                                      | The DC output has a SMB (m) connector. Recommend ordering N9910X Option 713 bias-tee power cable SMB (f) to BNC (m).                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| C. What are the connectors<br>for the Reference/<br>Trigger In and<br>Reference / Trigger Out? | The connector for the Ref/Trig In is SMA (f). Recommend ordering N9910X Option 712 Trig/Ref in SMA (m) to BNC (f) cable. The connector for the Ref/Trig Out is SMB (m). Recommend ordering N9910X Option 713 bias-tee power cable SMB (f) to BNC (m).                                                                                                                                                                                                                                                                                                                                     |
| D. What is Option 030 remote control capability?                                               | <ol> <li>Option 030 provides a license for FieldFox to allow remote control via an iOS or Android device.</li> <li>Not supplied by user, but necessary for operation of Option 030 are:</li> <li>iOS device: iPad, iPhone, or iPod Touch with iOS 6.1 or higher, or Android device with Android OS 9.0 or higher, with free FieldFox app</li> <li>A WiFi or 3G/4G network connection between FieldFox and iOS device or Android device</li> </ol>                                                                                                                                         |
| E. What USB sensor is required for Option 330?                                                 | Option 330 or pulse measurements requires a Keysight USB peak power sensor. Visit <a href="https://www.keysight.com/find/usbsensorsforfieldfox">www.keysight.com/find/usbsensorsforfieldfox</a> for a list of supported peak power sensors. Average power sensors cannot be used with Option 330, only peak power sensors. The peak power sensor needs to be purchased separately. Option 330 or pulse measurement requires Option 302 and Keysight USB power sensor                                                                                                                      |
| F. What measurement capabilities are included with Option 330?                                 | Average power, peak power, and peak to average ratio  Analog gauge display and digital display, dBm and watts  Relative/absolute measurements, dB or %, minimum and maximum limits  Trace graph for pulse profiling with gating  Rise time, fall time, pulse width, pulse period, pulse repetition frequency                                                                                                                                                                                                                                                                              |
| G. What is included with Option 208?                                                           | Option 302, USB power sensor measurements, includes <b>CW</b> power measurements (one frequency at a time). With Option 208 added, you can make <b>swept-frequenc</b> y power measurements. You can plot source power, gain, and receive power versus frequency. Additionally, the source frequency can be offset from the receiver frequency. The power sensor needs to be purchased separately.                                                                                                                                                                                         |

# FieldFox RF and Microwave Signal Analyzers

## **Analyzer models**

### Step 1. Select the model that provides the desired frequency range.

| Model  | Description                       | Frequency range <sup>1</sup> | Test port connectors    |
|--------|-----------------------------------|------------------------------|-------------------------|
| N9933B | 4 GHz FieldFox signal analyzer    | 9 kHz to 4 GHz               | Type-N (f)              |
| N9934B | 6.5 GHz FieldFox signal analyzer  | 9 kHz to 6.5 GHz             | Type-N (f)              |
| N9935B | 9 GHz FieldFox signal analyzer    | 9 kHz to 9 GHz               | Type-N (f)              |
| N9936B | 14 GHz FieldFox signal analyzer   | 9 kHz to 14 GHz              | Type-N (f)              |
| N9937B | 18 GHz FieldFox signal analyzer   | 9 kHz to 18 GHz              | Type-N (f)              |
| N9938B | 26.5 GHz FieldFox signal analyzer | 9 kHz to 26.5 GHz            | Type-N (f) <sup>2</sup> |
| N9960B | 32 GHz FieldFox signal analyzer   | 9 kHz to 32 GHz              | 2.4 mm (m)              |
| N9961B | 44 GHz FieldFox signal analyzer   | 9 kHz to 44 GHz              | 2.4 mm (m)              |
| N9962B | 50 GHz FieldFox signal analyzer   | 9 kHz to 50 GHz              | 2.4 mm (m)              |
| N9963B | 54 GHz FieldFox signal analyzer   | 9 kHz to 54 GHz              | 1.8 mm (m)              |

- Useable to 5 kHz.
   Order Option 100 for 3.5 mm (m) test port connectors. With N9938B-100, the spectrum analyzer is built with 3.5 mm test port connectors instead of the standard Type-N (f). Option 100 is a prerequisite for Option 320 for N9938B.

## **Analyzer options**

## Step 2. Select optional measurement capabilities.

You can also add any of these options as a software upgrade in the future.

| Option      | Description                                            | Prerequisite options/notes                                                                                                                                                           |
|-------------|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Spectrum a  | nalysis                                                |                                                                                                                                                                                      |
| 100         | 3.5 mm (m) connectors                                  | Only available on N9938B. Option 100 is only available at time of purchase. It is not available as an upgrade. It is a prerequisite for Option 320 for N9938B.                       |
| 209         | Extended range transmission analysis (ERTA)            | Requires 220. Recommend 307. Requires two FieldFox units.  See FAQ # 9. See page 9 for typical configuration.                                                                        |
| 220         | Full-band tracking generator                           | CW, CW coupled, and tracking                                                                                                                                                         |
| 235         | Pre-amplifier                                          | _                                                                                                                                                                                    |
| 236         | Interference analyzer and spectrogram                  | _                                                                                                                                                                                    |
| 238         | Spectrum analyzer time gating                          | _                                                                                                                                                                                    |
| 312         | Channel scanner                                        | Require the corresponding option to support a specific app. For example, to support EMF in channel scanner requires 358.                                                             |
| 320         | Reflection measurements (Return Loss, VSWR and Scalar) | 320 requires 220 on all models. On N9938B, 320 also requires 100.                                                                                                                    |
| 350         | Real-time spectrum analyzer (RTSA)                     | Recommend 235. See FAQ # 11                                                                                                                                                          |

| 2. What is included with Option                                                        | Interference analyzer and spectrogram                                                                                                                                                                                                                                                                                                                                                                   |
| 236?                                                                                   | Trace playback and recording                                                                                                                                                                                                                                                                                                                                                                            |
| 3. What is included with Option                                                        | Return loss and VSWR                                                                                                                                                                                                                                                                                                                                                                                    |
| 320?                                                                                   | Normalization using data/memory                                                                                                                                                                                                                                                                                                                                                                         |
| 4. What is the difference between Option 320 and the CAT mode on the combo base model? | Option 320 on the N993x/6xB SA offers RL and VSWR. CAT mode on the N991x/5x combo analyzers offer RL and VSWR, DTF, insertion loss, and various calibration capabilities such as OSL.                                                                                                                                                                                                                   |
| 5. What is included with Option 355?                                                   | FieldFox analog demodulation has two parts: (1) Tune and listen, and (2) AM/FM metrics. Tune and listen are available as a standard feature on all N993x/6x FieldFox spectrum analyzers. AM/FM metrics becomes available when Option 355 is purchased. AM/FM metrics provides the user with RF spectrum view, demodulated baseband signal waveform, carrier power, frequency deviation, SINAD and more. |
| Additional FAQs                                                                        | FAQs on pages 6 through 11 apply to all microwave FieldFox models.                                                                                                                                                                                                                                                                                                                                      |

## **Upgrades**

# FieldFox RF and microwave (combination) analyzer upgrades

N9913BU, N9914BU, N9915BU, N9916BU, N9917BU, N9918BU, N9950BU, N9951BU, N9952BU, N9953BU

Information on upgrades is available from: www.keysight.com/find/fieldfoxsupport

| Option | Description                                    | Upgrade contents | Additional requirements                                                |
|--------|------------------------------------------------|------------------|------------------------------------------------------------------------|
| 010    | VNA time domain analysis                       | License key      | Requires 210, recommend 211                                            |
| 030    | Remote control capability                      | License key      | Requires an iOS device or an Android device                            |
| 208    | USB power sensor measurements versus frequency | License key      | Requires 302                                                           |
| 209    | Extended range transmission analysis (ERTA)    | License key      | Requires 233 and 210 1, recommend 307                                  |
| 210    | VNA transmission and reflection                | License key      | None                                                                   |
| 211    | VNA full 2-port S-parameters                   | License key      | Requires 210                                                           |
| 212    | Mixed-mode S-parameters                        | License key      | Requires 210 and 211                                                   |
| 215    | TDR cable measurements                         | License key      | None                                                                   |
| 233    | Spectrum analyzer                              | License key      | None                                                                   |
| 235    | Preamplifier                                   | License key      | Requires 233                                                           |
| 236    | Interference analyzer and spectrogram          | License key      | Requires 233                                                           |
| 238    | Spectrum analyzer time gating                  | License key      | Requires 233                                                           |
| 302    | External USB power sensor support              | License key      | None                                                                   |
| 307    | GPS receiver                                   | License key      | None                                                                   |
| 308    | Vector voltmeter                               | License key      | Requires 210 and 211 for full VVM functionality                        |
| 309    | DC bias variable-voltage source                | License key      | Recommend N9910X-713 cable                                             |
| 310    | Built-in power meter                           | License key      | None                                                                   |
| 312    | Channel scanner                                | License key      | Requires 233                                                           |
| 330    | Pulse measurements                             | License key      | Requires 302 and USB peak power sensor                                 |
| 350    | Real-time spectrum analyzer (RTSA)             | License key      | Requires 233, recommend 235                                            |
| 351    | I/Q Analyzer (IQA)                             | License key      | Requires 233                                                           |
| 352    | Indoor and outdoor mapping                     | License key      | Requires 233, 307, and at least one of 312, 360, 370, 371, 377 or 378. |
| 353    | IQ streaming                                   | License key      | Requires 233 and 351                                                   |
| 355    | Analog demodulation                            | License key      | Requires 233                                                           |
| 356    | Noise figure (NF)                              | License key 2    | Requires 233, 235, 309 and accessory cable N9910X-713                  |
| 358    | EMF measurements                               | License key      | Requires 233. Also requires triaxial isotropic antenna. See FAQ #16    |

| Option | Description                                                                                     | Upgrade contents    | Additional requirements                                                                                                            |
|--------|-------------------------------------------------------------------------------------------------|---------------------|------------------------------------------------------------------------------------------------------------------------------------|
| 360    | Phased array antenna support                                                                    | License key         | Requires 233. Also requires phased array antenna. See FAQ #14                                                                      |
| 361    | EMI measurements                                                                                | License key         | Requires 233                                                                                                                       |
| 370    | Over-the-air (OTA) LTE FDD                                                                      | License key         | Requires 233 and 307, recommend 235                                                                                                |
| 371    | Over-the-air (OTA) LTE TDD                                                                      | License key         | Requires 233 and 307, recommend 235                                                                                                |
| 377    | Over-the-air (OTA) 5G TF 3                                                                      | License key         | Requires 233 and 307, recommend 235                                                                                                |
| 378    | Over-the-air (OTA) 5G NR                                                                        | License key         | Requires 233, B10, and 307, recommend 235; N991x/3xB models require external mixer for FR2 frequencies above 26.5 GHz. See FAQ #18 |
| 390    | Directional finding - time difference of arrival (TDOA) node support                            | License key         | Requires 233, 307 and PC software S9910A/S9911A, recommend 235; requires 3 or 4 networked FieldFox analyzers                       |
| 391    | Directional finding – angle of arrival (AoA)                                                    | License key         | Requires 233, 307, recommend 235                                                                                                   |
| B04    | Analysis bandwidth, 40 MHz <sup>4</sup>                                                         | License key         | Requires 233. Recommend 350, 351 or PathWave VSA (formerly 89600 VSA) software                                                     |
| B10    | Analysis bandwidth, 120 MHz <sup>4</sup>                                                        | License key         | Requires 233. Recommend 350, 351, 378 or PathWave VSA (formerly 89600 VSA) software                                                |
| S70    | OTA 5G NR and LTE FDD/TDD cellular measurements, node-locked 12-month subscription <sup>5</sup> | License key         | Requires 233, B10, 235, and 307                                                                                                    |
| S9910A | Keysight signal management software                                                             | PC software license | Installed in an external PC, pre-requisite for S9911A                                                                              |
| S9911A | Directional finding - TDOA                                                                      | PC software license | Installed in an external PC, requires 1 PC for the networked FieldFox analyzers installed with 390                                 |

- 1. Option 209 is a system based on two FieldFox units. See FAQ #9, for a detailed description of the system requirements.
- 2. See FAQ #13 for external preamplifier and noise source requirements.
- 3. Requires external mixer for N991xB (x>5) models. See FAQ #14. No external mixer required for N995xB.
- 4. 10 MHz standard.

0-4:---

5. If the 12-month subscription is expiring and needs to be extended, re-order Option BU-S70 for another period of 12 months.

| Option | Description                                                                                     | Upgrade contents    | Additional requirements                                                                                                   |
|--------|-------------------------------------------------------------------------------------------------|---------------------|---------------------------------------------------------------------------------------------------------------------------|
| 370    | Over-the-Air (OTA) LTE FDD                                                                      | License key         | Requires 307, recommend 235                                                                                               |
| 371    | Over-the-Air (OTA) LTE TDD                                                                      | License key         | Requires 307, recommend 235                                                                                               |
| 377    | Over-the-Air (OTA) 5G TF <sup>4</sup>                                                           | License key         | Requires 307, recommend 235                                                                                               |
| 378    | Over-the-air (OTA) 5G NR                                                                        | License key         | Requires B10 and 307, recommend 235. N993xB models require external mixer for FR2 frequencies above 26.5 GHz. See FAQ #18 |
| 390    | Directional finding - time difference of arrival (TDOA) node support                            | License key         | Requires 307 and PC software S9910A/S9911A, recommend 235; requires 3 or 4 networked FieldFox analyzers                   |
| 391    | Directional finding – angle of arrival (AoA)                                                    | License key         | Requires 307, recommend 235                                                                                               |
| B04    | Analysis bandwidth, 40 MHz <sup>5</sup>                                                         | License key         | Recommend 350, 351 or PathWave VSA (formerly 89600 VSA) software                                                          |
| B10    | Analysis bandwidth, 120 MHz <sup>5</sup>                                                        | License key         | Recommend 350, 351 or PathWave VSA (formerly 89600 VSA) software                                                          |
| S70    | OTA 5G NR and LTE FDD/TDD cellular measurements, node-locked 12-month subscription <sup>6</sup> | License key         | Requires B10, 235, and 307                                                                                                |
| S9910A | Keysight signal management software                                                             | PC software license | Installed in an external PC, pre-requisite for S9911A                                                                     |
| S9911A | Directional finding - TDOA                                                                      | PC software license | Installed in an external PC, requires 1 PC for the networked FieldFox analyzers installed with 390                        |

- 1. For N9938B, Option 320 is only available as a software upgrade if the spectrum analyzer is already equipped with Option 100, which is 3.5 connectors on the test port. Option 100 must have been ordered at the time of original purchase. It cannot be added later.
- 2. Option 209 is a system based on two FieldFox units. See FAQ #9, for a detailed description of the system requirements.
- See FAQ #13 for external preamplifier and noise source requirements.
   Requires external mixer for N993xB (x>5) models. See FAQ #14. No external mixer required for N996xB.
- 5. 10 MHz standard.
- 6. If the 12-month subscription is expiring and needs to be extended, re-order Option BU-S70 for another period of 12 months.

## **Documentation**

By default, a printed copy of the User's Guide is not included in FieldFox orders. If you wish to receive the printed User's Guide, please order N99xxA Option ABA.

| Option     | Description                     | Notes |
|------------|---------------------------------|-------|
| N99xxA-0B0 | Do not include User's Guide     |       |
| N99xxA-ABA | Printed User's Guide in English |       |

The latest FieldFox User's Guide (manual) is available online from: www.keysight.com/find/fieldfoxsupport.

The Service Guide, SCPI Programming Guide, Quick Reference Guide, and Data Link software help file can also be found via the website above.

## **Calibration Kits**

FieldFox analyzers support most standard HP/Agilent/Keysight mechanical calibration kits and all Keysight USB ECal modules. Component list shows calibration components, some calibration kits also include adaptors. Custom calibration kits can be created and uploaded to FieldFox using Data Link software.

#### Antennas

| N9910X-820               | Antenna, directional, multiband, 800 to 2500 MHz, 10 dBi, Type-N (f) |
|--------------------------|----------------------------------------------------------------------|
| N9910X-821               | Antenna, telescopic whip, 70 MHz to 1 GHz, BNC (m)                   |
| N9910X-822               | Antenna, directional, log periodic, 600 MHz to 9 GHz, Type-N (f)     |
| N9910XA-823 <sup>1</sup> | Antenna, cellular narrowband, 824 to 869 MHz, Type-N (f)             |
| N9910XA-824 <sup>1</sup> | Antenna, cellular narrowband, PCS 1850 to 1990 MHz, Type-N (f)       |
| N9910X-825               | Antenna, GPS, active, SMA (m)                                        |
| 85571A-028 <sup>1</sup>  | 5G Phased Array Antenna 28 GHz                                       |
| 85572A-006               | Triaxial Isotropic Antenna 30 MHz to 6 GHz                           |

1. Currently not RoHS compliant.

#### RF and microwave adapters

| 83059A     | Coaxial adapter, 3.5 mm (m) to 3.5 mm (m), 26.5 GHz                                           |
|------------|-----------------------------------------------------------------------------------------------|
| 83059B     | Coaxial adapter, 3.5 mm (f) to 3.5 mm (f), 26.5 GHz                                           |
| 83059C     | Coaxial adapter, 3.5 mm (m) to 3.5 mm (f), 26.5 GHz                                           |
| N9910X-601 | Coaxial adapter, NMD 2.4 mm (f) to Type-N (f), 50-ohm, 18 GHz                                 |
| N9910X-602 | Coaxial adapter, NMD 2.4 mm (f) to 2.92 mm/K (f), 40 GHz                                      |
| N9910X-603 | Coaxial adapter, NMD 2.4 mm (f) to 3.5 mm (f), 26.5 GHz                                       |
| N9910X-604 | 3.5 mm NMD (f) to 3.5 mm (f) adapter, 26.5 GHz                                                |
| N9910X-605 | 3.5 mm NMD (f) to Type-N (f) adapter, 18 GHz                                                  |
| N9910X-843 | Coaxial adapter, Type-N (m) to 7/16 DIN (f)                                                   |
| N9910X-845 | Adapter kit: Type-N (f) to 7/16 DIN (f), Type-N (f) to 7/16 DIN (m), Type-N (f) to Type-N (f) |
| N9910X-846 | Coaxial adapter, Type-N (m) 50 ohm to Type-N (f) 75 ohm                                       |
| N9910X-847 | Adapter kit: Type-N (f) to TNC (m) adapter, Type-N (f) to TNC (f) adapter, 10 GHz             |
| N9910X-848 | Coaxial adapter, Type-N (f) to 3.5 mm (f), 18 GHz                                             |
| N9910X-849 | Coaxial adapter, Type-N (f) to 3.5 mm (m), 18 GHz                                             |
| N9910X-850 | Coaxial adapter, Type-N (m) to Type-N (m), 18 GHz                                             |
| N9910X-851 | Coaxial adapter, Type-N (f) to Type-N (f), 18 GHz                                             |
| N9910X-852 | Coaxial adapter, Type-N (m) to Type-N (f), 18 GHz                                             |
| N9910X-856 | Coaxial adapter, 2.4 mm (f) to 2.4 mm (f), 50 GHz                                             |
| N9910X-857 | Coaxial adapter, 2.4 mm (f) to 2.92 mm/K (f), 40 GHz                                          |

#### OML frequency extender modules

OML frequency extenders can be purchased directly through OML, Inc. One mixer, OML model number M28H2ADC-K (24 to 40 GHz), has been set up as a Keysight special handling part number N9910XM28-H2A for 3.5 mm test ports or N9910XM28-H2N for Type-N test ports and they are available for sale directly through Keysight. Contact OML, Inc. directly (www.omlinc.com) for pricing, ordering and datasheet information or contact a Keysight representative for assistance.

FieldFox operating modes that support frequency extenders include: Spectrum analyzer, real-time spectrum analyzer, I/Q analyzer, over-the-air (LTE FDD, 5GTF), phased array antenna support and PathWave vector signal analysis software (formerly 89600 VSA).

| OML model number        | OML mixer frequency range | Frequency range with FieldFox models N9917/18/5xB and N9937/38/6xB | Frequency range with FieldFox models N9916/36B |
|-------------------------|---------------------------|--------------------------------------------------------------------|------------------------------------------------|
| M28H2ADC-K <sup>1</sup> | 24 to 40 GHz              | 24 to 40 GHz                                                       | 24 to 34 GHz                                   |
| M15H4ADC                | 50 to 75 GHz              | 50 to 75 GHz                                                       | 50 to 62 GHz                                   |
| M12H6ADC                | 60 to 90 GHz              | 60 to 90 GHz                                                       | 60 to 90 GHz                                   |
| M10H6ADC                | 75 to 110 GHz             | 75 to 110 GHz                                                      | 75 to 90 GHz                                   |

1. Not applicable to N9951/61B, N9952/62B, and N9953/63B models with maximum frequency coverage of 44, 50, and 54 GHz, respectively.

#### OML frequency extender module adapter kits

OML frequency extender module adapter kits make for easier connection to FieldFox units with Type-N or 3.5 mm. Frequency extender adaptors work with OML frequency extender model number M28H2ADC-K (24 to 40 GHz), or Keysight special handling part number N9910XM28-H2A that is available for sale directly through Keysight. Alternatively, Keysight also offers a special handling part number N9910XM28-H2N that has Type-N (m) connectors for LO input and IF output. Users can connect the frequency extender directly to the FieldFox analyzer with Type-N test ports eliminating the need for adapters. Please see N9910XM28 web page for more detailed information.

When ordering the OML frequency extender as Keysight model number **N9910XM28-H2A**, add the adapter kits shown below as Keysight model numbers N9910XM28-AK1, -AK2, -AK3, -AK4 and -AK5.

When ordering the OML frequency extender as Keysight model number N9910XM28-H2N, add the adapter kits shown below as Keysight model numbers N9910XM28-AK4, -AK5, and -AK6. (Note -AK1, -AK2, and -AK3 are intended for N9910XM28-H2A only)

| Model number  | Description                                                                                                                                                                                                                                                                                                                 |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| N9910XM28-AK1 | Coaxial straight Male-N to Male-SMA, Qty 2 included, connects the mixer model N9910XM28-H2A, with SMA LO and IF connectors, directly to the FieldFox with Type-N ports, for example FieldFox Model N9917B. The new mixer Model N9910XM28-H2N has Type-N LO and IF connections for direct connection to the FieldFox N9917B. |
| N9910XM28-AK2 | Coaxial straight Female-SMA to Female-N, Qty 2 included, used as a spacer with N9910XM28-AK1 for FieldFox units with 3.5 mm ports when the GPS antenna is mounted vertically.                                                                                                                                               |
| N9910XM28-AK3 | Coaxial straight Male-SMA to Female-SMA, Qty 2 included, connects mixer directly to FieldFox with 3.5 mm ports. Required to provide space for the GPS Antenna when used with right angle adapter N9010XM28-AK4.                                                                                                             |
| N9910XM28-AK4 | Female-SMA to Male-SMA, Right Angle, Qty 1, included. For connecting GPS antenna at right angle and used for GPS antenna attachment with N9910XM28-AK1 or N9910XM28-AK3 adapter kits. Can also be used to provide a right-angle connection to Ref/Trig input.                                                               |
| N9910XM28-AK5 | Waveguide horn antenna and mounting fixture.                                                                                                                                                                                                                                                                                |
| N9910XM28-AK6 | Type-N Male-Female adapter. Acts as a spacer to offset the mixer from the FieldFox to allow access to the Trig/Ref input connector which is blocked by the USB Mini connector when the N9910XM28-H2N is connected directly.                                                                                                 |

When ordering the OML frequency extender adapter kits separately (not added to an order with Keysight model number N9910XM28-H2A or N9910XM28-H2N), order the adapter kits shown above (N9910XM28-AKx) as the Keysight part numbers shown below.

| Part number | Description                                                                                                                                                                                                                 |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1250-1636   | Coaxial straight Male-N to Male-SMA, order Qty 2, connects mixer directly to FieldFox with Type-N ports. See N9910XM28-AK1 complete description above.                                                                      |
| 1250-3968   | Coaxial straight Female-SMA to Female-N, order Qty 2, spacer for FieldFox units with 3.5 mm ports and used with (part number 1250-1636 adapter kit shown above) when GPS antenna is mounted vertically.                     |
| 1250-3851   | Coaxial straight Male-SMA to Female-SMA, order Qty 2, connects mixer directly to FieldFox with 3.5 mm ports.                                                                                                                |
| N0000-33203 | Female-SMA to Male-SMA, Right Angle, Qty 1, for connecting GPS antenna at right angle and used for GPS antenna attachment with (part number 1250-1636 or 1250-3851 adapter kits shown above).                               |
| 0950-6352   | Antenna and mounting fixture, 0.75-inch square flange plastic, Qty 1 included, to be used with 0955-3591 below.                                                                                                             |
| 0955-3591   | Waveguide horn antenna, pyramidal Ka-band 26.5 to 40 GHz WR-28, Qty 1 included, also order 0950-6352 above for mounting fixture.                                                                                            |
| 85032-60020 | Type-N Male-Female adapter. Acts as a spacer to offset the mixer from the FieldFox to allow access to the Trig/Ref input connector which is blocked by the USB Mini connector when the N9910XM28-H2N is connected directly. |

#### Other RF and microwave accessories

| Model       |                                                                                                         |
|-------------|---------------------------------------------------------------------------------------------------------|
| N9910X-860  | Fixed attenuator, 40 dB, 100 W, DC to 3 GHz, Type-N (m) to Type-N (f)                                   |
| N9910X-861  | Fixed attenuator, 40 dB, 50 W, DC to 8.5 GHz, Type-N (m) to Type-N (f)                                  |
| N9910X-8741 | External bias-tee, 2.5 MHz to 6 GHz, 1 W, 0.5 A                                                         |
| N9910X-886  | Torque wrench, 17 mm, 90 N-cm (8 in-lb), used for connecting with 3.5 mm, 2.4 mm, or 1.85 mm connectors |
| N9910X-712  | Trig/Ref in Cable SMA (m) to BNC (f), 1 m or 3.28 ft                                                    |
| N9910X-713  | Bias-tee power cable SMB (f) to BNC (m), 1 m or 3.28 ft                                                 |

#### Other FieldFox accessories

| N9910X-876 | Extra highcapacity battery                                                           |
|------------|--------------------------------------------------------------------------------------|
| N9910X-872 | External battery charger                                                             |
| N9910X-873 | AC/DC adapter                                                                        |
| N9910X-875 | DC car charger and adapter                                                           |
| N9910X-880 | Extra soft carrying case with backpack and shoulder strap                            |
