# BRIGHT & CLEAR 1080p PROJECTOR FOR BOARDROOM AND CLASSROOM EH345

# ROBUST PROJECTION FOR CORPORATE AND EDUCATION

3200 lumens and 22,000:1 contrast ratio produce a sharp luminous image

Advanced Optical Lens features a 1.3x ZOOM

Extensive array of connectivity options featuring dual HDMI with MHL, VGA-out, and Audio-in

Powerful 10 Watt sound enhances presentations and audio/video with crisp and clear sound

Optional VGA Wireless Dongle or HDCast Pro allow for Wireless Mirroring and Streaming

sRGB color profile enables vibrant and highly accurate colors via Rec709 HDTV spec

The Optoma EH345 is a powerful projector that delivers an excellent balance of affordability and performance with 3200 lumens, 22,000:1 contrast ratio, sharp, readable text, and smooth, colorful visuals. It is well-equipped for today's corporate and education environments with 2x HDMI 1.4a ports, VGA-Out, 10,000-hour lamp life, 1.3x zoom for flexible installations, and a powerful 10-watt speaker that enhances presentations and multimedia content with loud, sharp, and clear audio.

The EH345 is engineered for corporate professionals and educators looking to project Powerpoint presentations, spreadsheets and other rich media content in high resolution 1080p. With a shorter throw ratio than most standard throw projectors, the EH345 is ideal for small conference rooms and classrooms with limited space to install a projector. MHL v2.1 support enables the use of video display dongles and adapters from various manufacturers, allowing presenters to create an inviting and collaborative presentation environment.

The EH345's impressive lamp life enables 10,000 hours of use before a replacement is necessary. Its Wall Color Adjustment feature is designed to compensate for the loss of brightness when projecting on non-white projection surfaces in various environments. This feature is extremely useful in classrooms, conference rooms, training rooms or anywhere the presenter may be using a colored wall, blackboard, chalkboard, or whiteboard for the projection surface, ensuring that images are as clear and bright as possible.
