

## GT105k-12/Z Control Thermometer

The drawings, photos and graphics used are for illustrative purposes only.

### Overview

The control thermometer is designed for cooperation with RADWAG moisture analyzers. It enables measuring drying temperature value using a probe mounted on a cable. The GT105k-12 series features fully waterproof housing and a switch-off function preventing accidental discharging of the batteries. Power supply by batteries 3×1,5V (LR44). Optionally, the thermometer is available with a calibration certificate.

### Compatible with

MA X2.IC.A Moisture Analyzer  
MA X2.A Moisture Analyzer

MA R Moisture Analyzer
