

RoboSHOT 30E NDI

Professional AV Broadcast Camera

The Only Camera Solution for Native NDI

The RoboSHOT® 30E NDI® PTZ Camera is designed with NewTek NDI® (Network Device Interface) technology, which makes it easy to share high-quality video over a local Ethernet network. It's perfect for broadcast solutions where customers need a high-end NDI camera to work with their NewTek TriCaster® controller and existing NDI system, and is ideal for large meeting rooms, lecture halls and houses of worship. The RoboSHOT 30E NDI is currently the only camera that offers full native NDI; other cameras are NDI | HX which is suited for limited bandwidth installations.

NewTek's NDI technology allows multiple video and audio sources to be shared across a network. This eliminates costly direct connections, expensive cable runs, and infrastructure upgrades – while turning every source into a destination instantly available anywhere on the network.

Full NDI. Lower Latency. Better Quality.

For PTZ video installations that require an NDI signal, there is no better option than the RoboSHOT 30E NDI Camera. This RoboSHOT Elite Series camera complies with the most rigorous NDI standards to deliver one of the lowest signal latencies in the industry for superior live, on-air camera control, switching and streaming.

Based on the proven track record of Vaddio's RoboSHOT Elite camera, the RoboSHOT 30E NDI offers plug and play simplicity. Just connect the camera to the network and open your NewTek control software. The camera is instantly available for NDI control and streaming without installing any additional drivers.

Features

- High quality, low distortion lens
- 1/2.5-type Exmor R CMOS sensor
- **Enhanced wide dynamic range** – Cutting-edge image signal processing (ISP) results in better light-gathering capabilities, incredible contrast and sharp 1080p/60 video, even in dim lighting conditions
- **30x zoom featuring IntelliZoom™ Image Processing** – 20x optical zoom and an additional 10x of IntelliZoom™ Image Processing, to zoom greater distances without compromising any resolution quality of the image
- Wide 70.2° horizontal field of view
- **Video outputs** – simultaneous HDMI and full NewTek NDI streaming, with one of the lowest signal latencies in the industry
- **PoE+ powered** (instead of 12v power supply) for easy installation
- **Tri-Synchronous Motion technology** – ultra-smooth, natural camera motion
