

# OneLINK Codec Kits

## For Cisco and Polycom Codecs

### More Choices for Room Design and Installation

Tailored for Cisco® and Polycom® Codec Systems, Vaddio OneLINK™ Codec Kits enhance capabilities of close-ended hard codecs – allowing you to extend power, video and control up to 328 feet (100 meters).

OneLINK Codec Kits also give you the freedom of camera choice by providing the option to connect Cisco, Polycom, or Vaddio® cameras to codec rooms. Enjoy the added flexibility of connecting to any cloud conferencing software with Vaddio's OneLINK Bridge Codec Kits.

#### Benefits:

- More flexibility in camera and/or codec placement
- Select the right camera for the room with more options than ever – including RoboSHOT® cameras with 12x, 20x, and 30x optical zoom
- Deliver uncompressed, high definition cloud conferencing with USB 3.0 available on OneLINK Bridge Codec Kits, for end users who want to enjoy the benefits of tools such as Skype for Business, WebEx, Google Hangouts, Zoom and others

*Vaddio OneLINK extensions & cameras are now compatible with the popular Cisco TelePresence® SX20 Codec.*

# More Design Freedom. More Flexibility. More Choices.

With OneLINK Codec Kits, camera placement is no longer dependent on the location of the codec. OneLINK solutions provide an HDBaseT™ interface that extends video, power control and network up to 328 feet (100 meters). This means Cisco® and Polycom® systems can now go into larger rooms, while appealing to end users who want to enjoy the benefits of cloud conferencing.

You also have the option to use Vaddio RoboSHOT® PTZ cameras in rooms with Polycom and Cisco codecs – which gives you a broader array of camera choices at your disposal for room designs including 12x, 20x and 30x optical zoom.

## Features

- HDBaseT interface extends video, power, control and network over a single Cat-6 cable up to 328 ft (100 m)
- USB 3.0 output and audio bridging with OneLINK Bridge Codec Kits
- Camera interoperability – RoboSHOT cameras can now be used with Polycom or Cisco codecs
- Intuitive browser-based user interface for camera control and remote management
- Crestron, AMX and Extron control API
- Plug and play usability that Vaddio customers have come to know and expect

## OneLINK Codec Kits include:

- OneLINK extension system
- EZIM (not needed with Vaddio HDBT kits)
- Cables\*
- Camera mount (in third-party camera kits)

\*Please note: When connecting any Cisco codec to a Cisco Precision 40 or PrecisionHD 1080p2.5x camera, you will need to provide a Cisco CAB-PHD4XS2-SPLIT cable. When connecting a Cisco SX20 codec to any camera (either Cisco or Vaddio), you will need to provide the same Cisco CAB-PHD4XS2-SPLIT cable.

## Ordering Information

Description	North America	Europe/UK	Australia/New Zealand
<b>For Cisco TelePresence SX20, SX80 and C-Series Codecs</b>
