

Network Time Machine

Quick Start Guide: Premium 3 Model

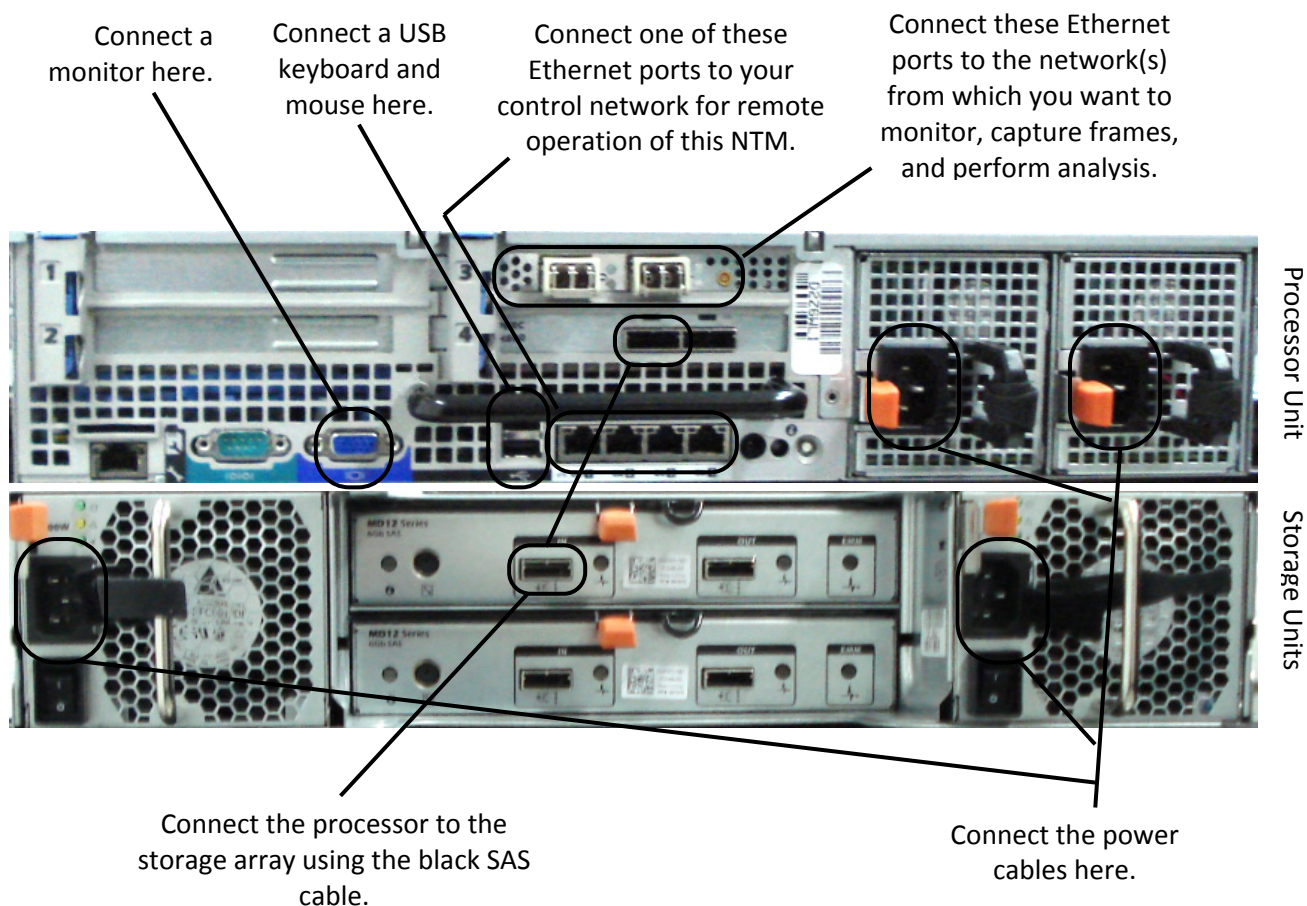

Your Network Time Machine (NTM) comes with the software already installed and licensed. After you have unpacked it from its shipping container, proceed as follows:

1. Install the NTM in a 19-inch rack.
2. Connect cables as shown in the figure below.
3. Turn on AC power to the storage units. Wait until all the green front panel LEDs on the disk drives have stopped flashing (up to 3 minutes). Then turn on the processor unit.
4. When the Windows 2008 server login screen appears, login with username **operator** and password **ClearSight1**.
5. Start the NTM application by selecting **Start > All Programs > ClearSight Distributed > ClearSight Network Time Machine Distributed Agent Manager**.
6. After it launches, add the Agent:
 - Host: **localhost**
 - Username: **Admin**
 - Password: (leave blank)
7. Connect to the Agent.

If you are using a 1 Gbps adapter, the ports will look like this:

If you are using a 10 Gbps adapter, the ports will look like this:
