

Fluke Networks Europe
Bernhardgasse 8A/1
A-2340 Mödling AUSTRIA

Attention: Mr. Christian Schillab
EMEA Product Manager, Copper Certification

Dear Mr. Schillab,

The CTI Netzwerksysteme GmbH has evaluated the DTX-1800 Cable Analyzer for the use of testing category 7 / class F networks based on connectors described in IEC 61076-3-104 like Siemon TERA™. We have tested both the Fluke solution for class F permanent link testing and channel testing. The test results obtained with this field tester correlate very closely with tests performed with network analyzers. We are impressed with the speed and accuracy of the DTX-1800.

Therefore, CTI Netzwerksysteme GmbH is pleased to endorse and recommend the Fluke DTX Series Cable Analyzers for use in field-testing of Cabling System *cti-wire*. We will accept the test results provided with this tester for our warranty program.

We look forward to a continued cooperation and future opportunities to evaluate Fluke Networks products that can be used to test and certify our cabling installations in the field.

Best regards,

A handwritten signature in blue ink, appearing to read 'Ernst Klees', with a long, horizontal flourish extending to the right.
