Attention: Mr. Christian Schillab
EMEA Product Manager, Copper Certification

Dear Christian,

Dätwyler Kabel + Systeme GmbH Company has evaluated the DTX-1800 CableAnalyser™ in our laboratories. The test results obtained with this field tester correlate very closely with tests performed with laboratory equipment such as the Rhode & Schwarz Network Analyzer. We are impressed with the speed with which this tester executes an Autotest and with the accuracy of this tester as manifested by the near perfect correlation of the results with laboratory reference equipment.

Therefore we think, that the DTX-1800 can be used for field-testing of our Dätwyler Cabling Systems.

We look forward to a continued cooperation and future opportunities to evaluate Fluke Networks products that can be used to test and certify our cabling installations in the field.

Sincerely,

i.V. Stefan Zech
Produktmanager
