Everett, WA 98203

Attention: Mr. Adrian Young
Senior Product Specialist

Dear Adrian,

This is to acknowledge receipt of a set of Fluke DTX-1800 Cable Analyzers that were sent to SYSTIMAX® Laboratories for evaluation. We have evaluated the DTX-1800 Cable Analyzer in conjunction with DTX-CHA001 channel adapters, DTX-PLA001 link adapters and PM25/PM06/PM10 personality modules for several key electrical parameters when testing channels and permanent links using SYSTIMAX SCS GigaSPEED® XL and Power Sum components. We found a high degree of correlation in tests performed and have concluded that these cable analyzers are suitable to characterize the performance margins of installed GigaSPEED XL and Power Sum systems against ANSI/TIA/EIA-568-B.2-1 and ANSI/TIA/EIA-568-B.1 standards respectively.

We look forward to continued cooperation in working with you in the future to evaluate upgrades to your software/firmware as they become available

Regards,

Richard Y. Mei
Technical Manager
Systems Engineering, SYSTIMAX Solutions
