Approval Fluke PM01 and PM06

Dear Christian,

SETEC Netzwerke AG has completed it's evaluation of the Fluke Networks' Personality Modules PM06 and PM01, and approves the use of this modules with the Fluke Networks' Universal Permanent Link Adapter for the certification of installed Category 6 cabling links constructed with SETEC CAT6 outlets and SETEC CAT6 Patch Panels.

In June 2002 addendum No.1 to TIA/EIA -568-B.2 discussing Transmission Performance Specifications for 4 -pair 100 Ω Category 6 Cabling was approved. This document contained specific Category 6 de-embedded NEXT loss ranges that modular test plugs must meet. Fluke Networks responded to these new specifications by developing the PM06.

SETEC Netzwerke AG appreciates Fluke Networks' continued efforts to make standards compliant permanent link testing possible.

SETEC Netzwerke AG has full confidence that the Fluke DSP-4000 series tester used with the DSP-LIA101 Universal Permanent Link Adapter and the Personality Module PM06 is a standards compliant permanent link testing solution for both shielded and unshielded installations.

Fluke Networks' Personality Module PM06 and PM01 are the approved module for testing of the shielded and unshielded SETEC CAT6 outlets and SETEC CAT6 Patch Panels. These products will all be tested to the TIA Category 6 Permanent Link limits. Please update Fluke Networks' Website, Technical Support Personnel and Knowledge base to reflect the SETEC Netzwerke AG approved test equipment and limits.

SETEC Netzwerke AG looks forward to continue working with Fluke Networks in the future.

Yours

Franz Neff
Managing Director
SETEC Netzwerke AG
