CAREER BUDDY

It's a choice that will make you finest from rest

The career choices of 90% of students are influenced by peers, parents or societal pressures, resulting into unhappy & stressful child and hence parents.

Students are unaware of the importance & process of self-analysis while parents are facing communication problems to convey the same with their own children

Parents are struggling to balance their professional and personal lives, hence are not able to research about various career streams available by their own and fall prey to the unauthentic resources

At the end, whole family is at unrest; personally, financially and most importantly emotionally
