Leather 401

Café

The warmth, softness, and gently-aged look of the Café leather line invites you to sink into your chair and enjoy your favorite drink without fear of spills or stains. With its light pebble finish, wax treatment and two-tone aniline dye, there is a depth, variation, and clarity to Café's rich and natural colors that is only found with true aniline leathers. And the Crypton® protective finish gives the leather an unmatched level of stain resistance and cleanability. Go ahead – enjoy your latte worry-free in your favorite chair.

Caprone

Caprone is a superbly priced Italian leather with a soft hand and a classic grain, prized for its long color line, durability and versatility. An Italian beauty in fashionable and bright colors, Caprone doesn't distress or patina and is also incredibly durable. Caprone remains a top seller because it is regularly upgraded, made ever softer and cleaner in updated colorways. Still made in Italy on quality European hides, Cortina's Caprone is soft and yielding to the touch, yet is highly resistant to stains, wear, and color fading due to its strong protective topcoat. IMO approved, Caprone is a beautiful, practical, and well-priced mainstay leather ready for every interior application.

Davenport

Well-protected by our exclusive Crypton finish, Davenport is a beautiful, quality leather with a soft hand and a good drape. Aniline dyed and finished with a durable yet light finish, Davenport is stocked in over 30 colors, making it the perfect choice for a broad range of applications. Natural markings are minimized by enhancing the surface with an embossed grain which maximizes yield and increases the cutting area.

Florence CRYPTON

In the heart of Italy lies the inspiration for one of Cortina's best-selling performance leathers — Florence. The warm and familiar colors and gentle distressing evoke the rich tapestry that defines a magical city: cobbled streets, historic facades, and enduring craftsmanship. Made in the U.S. with meticulous attention to detail, Cortina's Florence collection is a symbol of this craftsmanship. In addition to its timeless beauty, it's the practicality of Florence that makes it stand out. Unlike similar aniline distressed leathers, Florence is offered at an attainable price-point and protected with a Crypton® finish built in for cleanability and sustainability with confidence in all interiors. With a waxy, firmer hand, Florence was designed to highlight the natural markings of truly authentic genuine leather and will develop a time-tested story of luxury with a slowly evolving patina.

Old English

Old English is a beautiful hand-antiqued leather combining traditional craftsmanship with modern leather tanning and finishing technology. The two-tone coloring is applied completely by hand in our U.S. facility. The surface is then enhanced with a polished sheen, which accents the intricate blending of the color treatments and protects the leather against wear and spills, making Old English a good choice for any application.

BEYOND THE GRAIN™

Understanding leather will help you choose the right leather for each project. JSI selects top-grain aniline leather with Crypton protection and pigmented leathers for superior consistency, yield, and protection.

Top-grain leather

- The topmost layers of the hide are buffed or sanded to allow for a desired appearance, improve finish adhesion, and reduce or remove the appearance of natural markings such as bug bites and wrinkles.
- A consistent or corrected grain is added back to the hide by high-heat embossing.
- Top-grain crust starts out like a blank canvas, perfect for consistency, advanced finishes, and custom orders.

| JSI leather types | Characteristics | |
|---|---|--|
| Aniline ● Café ● Florence | <ul style="list-style-type: none"> • Natural leather with increased stain protection • No pigments are used—transparent aniline dyes applied to even the color, add dimension and depth • Exhibit the broadest variety of looks—two tones, pull-up, distressing, etc. | <ul style="list-style-type: none"> • Most will patina and age gracefully • Cortina offers four with Crypton protection built-in for industry's best stain resistance and cleanability • All celebrate the authentic and organic markings of genuine leather |
| Pigmented ● Caprone ● Davenport ● Old English | <ul style="list-style-type: none"> • Strongest performance with consistent color & grain pattern • Fewest natural markings—high cutting yield • Maintains appearance with age • Ideal for high-traffic installations | <ul style="list-style-type: none"> • Easily cleaned and highly stain resistant • Many of the fun specialty leathers are pigmented: exotic animal prints, bright colors, metallics, pearlized • Very easy to customize |

Natural markings

Leather is a natural product and the markings on each hide reveal its story and make it unique. Natural markings can be found on all genuine leather, least so on top-grain pigmented leathers. Where uniformity is desired, leather upholsterers can cut the panels to avoid markings. Leather lovers may choose to highlight the markings in their furniture. For successful upholstery applications on every project choose a leather type that is fit-for-purpose and provide the upholsterer with clear instructions of your intent.

Click to explore Cortina's full Beyond the Grain brochure and expand your leather IQ.

Cortina & Crypton CRYPTON.

Cortina Leathers is the exclusive manufacturer of genuine leathers with Crypton protection on more than 200 skus. Bleach cleanable and carrying the industry's longest limited warranty up to five years, never sacrifice beauty for performance again.

Circular by nature. Sustainable by design.

Like JSI, in every decision we make, Cortina Leathers considers the earth we all share. We continually evaluate and adjust our business approaches to ensure we are operating in a way that protects our environment and each other.

- Cortina's genuine leather is friendly to ourselves and our environment: As a natural, bio-based product, leather is safer and more sustainable than currently available alternatives. All Cortina leathers comply with strict European REACH standards, and Cortina's leather is biodegradable.
- Our leather is 100% a by-product of the food industry. No cow is raised for its hide. Currently 30% of hides are not upcycled and are disposed of through landfill or incineration, negatively impacting our environment. By investing in bio-based genuine leather, you are positively participating in a circular economy.
- We upcycle the material to produce one of mankind's oldest and most beautiful, versatile, and durable textiles ever known.
