

Measurement Services

From  BuildingEngines

Capture accurate measurements for your commercial spaces – down to the last square foot.

Building Engines delivers industry-leading field measurement services to ensure your rentable square footage (RSF) metrics are always accurate and aligned with current BOMA or REBNY standards.

Gain confidence in your measurement data.

We use modern laser and 3D technology for unquestioned accuracy.

Uncover new leasing & revenue opportunities.

Be sure you're always maximizing the RSF of your commercial spaces.

Make smarter, data-driven decisions.

Gain new insight into your spaces with support from our expert consultants at every step.

GET MORE POWER WITH BEST-OF-BREED CRE SOFTWARE

Want to take space management to the next level? Pair your measurement data with **Real Access from Building Engines**.

RealAccess is your space management hub. Utilize interactive floor plans, analytics, stack diagrams, leasing tools – even sync with your accounting system to visualize key occupancy data in real time.

[Learn More →](#)

WHAT'S INCLUDED:

- On-site measurement of buildings contracted using our laser and 3D technology
- Full or partial building measurements (as needed)
- Core, shell and demising data, with option to include other existing conditions (interior partitions, etc.)
- Optional import of tenant occupancy data (names, suite numbers, lease per SF, upcoming expirations, etc.)
- CAD files for all measurements taken
- Plan Book including color-coded floor plans with CAD background files, area calculation reports, and more
- Consultant services and on-hand support

“The gold standard in space measurement.”
