

Need to manage your Real Estate and Facilities Projects more easily?

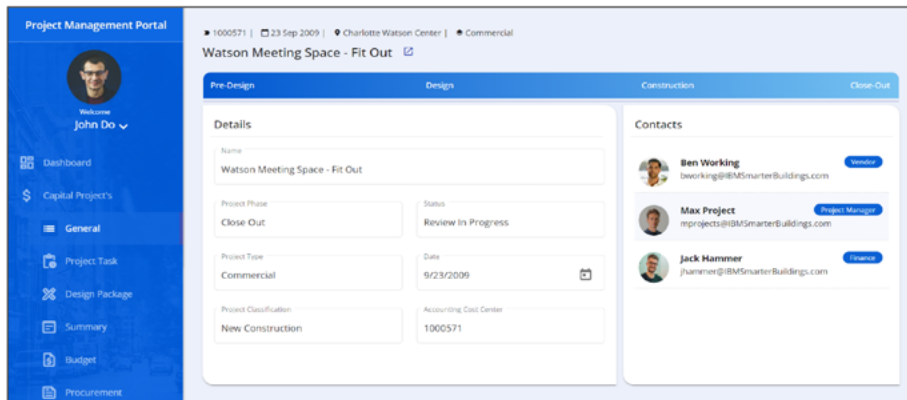

JLLT's Project Management Portal for TRIRIGA is designed to help users initiate, manage, and execute the end-to-end lifecycle for all types of projects (such as facilities projects, events, and capital projects). It displays projects by different categories through interactive charts, allowing users to filter required projects easily. The portal makes tracking contacts, schedules, budgets, cash flow, payments, and other details much more intuitive and efficient. This user-friendly app also provides context-based help to train new users on buttons and features - or as a refresher for current users.

Key Features

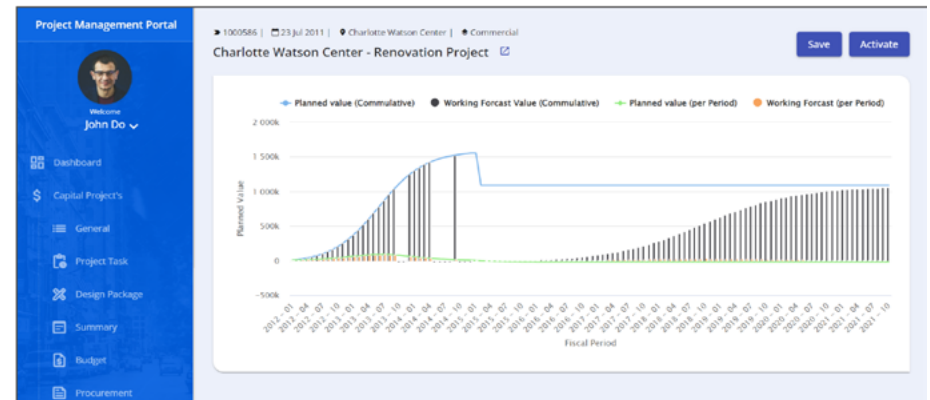

- Designed and optimized to help users search, locate, and navigate their projects more quickly.
- Easy access to project task details.
- Personalized dashboards.
- Graphical charts and maps for easy filtering and analysis.
- Card views provide critical financial details.
- Tracking support for project funding, budgets, procurement, and other related payments.
- Intuitive design for quick user adoption, including an interactive tour guide.

JLLT's Project Management Portal for TRIRIGA will help you track all your project information in one place.

Quickly review contact roles and critical information that drives how to manage the respective project.

Plan and actively update the project forecast based on contractual obligations and current or planned milestone payments.
