

Prism Inspections

Standardize performance and ensure compliance at every property

Prism Inspections provides property management teams with a smarter, simpler, and centralized way to evaluate the condition of their properties and gain valuable insight into their buildings' health.

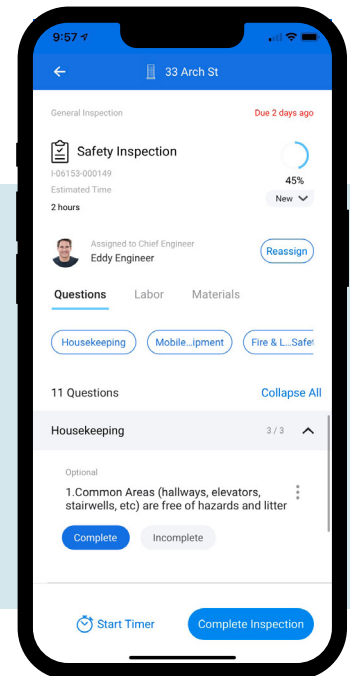

Benefits of Prism Inspections:

Empower engineers with mobile solutions that streamline their daily operations and boost efficiency

Enhance productivity with a streamlined and faster way to complete rounds and collect readings

Complete inspections 'on-the-go' from any mobile device, even in areas with poor reception or no internet connection

Streamline move-in and move/out processes, capture inspection labor expenses, and centralize all inspections-related information in one location

Gain insight into building conditions and proactively manage your portfolio's performance

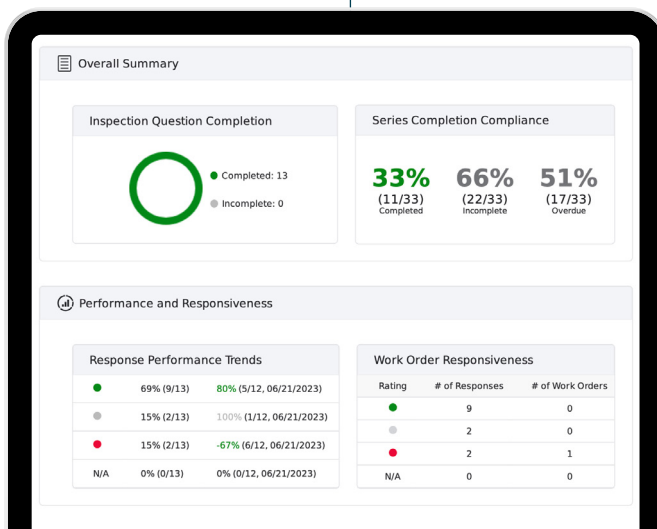

Identify trends and spot potential issues before they arise with visual analytics dashboards and reports

Assign scores to inspections to measure your property's performance against predetermined targets

Generate comprehensive, shareable reports that provide visibility into your building operations and operational effectiveness

Standardize compliance and performance

Create inspection templates that auto-generate tasks for selected properties, ensuring consistency and time savings

Evaluate staff compliance during inspections and identify areas for improvement

Configure inspection questions to require conditional or photo responses, attach images via smartphone, and generate work orders directly from inspection responses

New! Easily log refrigerant usage and top-offs while completing inspections on equipment
