CRE's all-in-one leasing workflow management platform

Take control of your CRE leasing process and maximize occupancy across your portfolio with Dottid, the unified solution that accelerates leasing velocity through streamlined workflows, intelligent insights and improved collaboration.

Close deals faster with streamlined leasing workflows

Automate leasing workflows with technology that keeps teams accountable and empowers them to close more deals.

- Leasing teams always know their next move with smart dashboards that highlight deals that need attention.

- Get complete visibility into your pipeline with smart notifications on the latest prospect inquiries and trends.

- Auto-calculate proposed rent schedules and stop wasting time on manual data entry.

- View deal financials, manage multiple landlord and tenant offers, and create counter-offers.

Powering leasing across office, industrial and retail properties

Office
View real-time stacking plans and suite encumbrances.

Industrial
Access asset-specific details including clear height and dock doors.

Retail
Track exclusive uses and percent rent terms.

> *Dottid is a fantastic tool to manage activity in our portfolio. Our property teams appreciate its easy interface and tracking capabilities from lease signing to tenant move-in.*

Insights to optimize your leasing strategy

Access powerful analytics to make smarter, data-driven decisions that supercharge your leasing strategy.

- Generate dynamic occupancy forecasts over the next 3, 5 and 7 years based on your deal pipeline.
- Customizable reporting lets you view and export data in ways that work for you.
- Get in-depth views of portfolio performance with tenant industry breakdowns, key financial metrics, leasing activity and more.
- Compare the performance of leasing teams across your portfolio and identify areas for improvement.

Easy access to property and leasing information

Foster seamless communication and collaboration across your organization with solutions that centralize property and leasing information.

Organize all your important leasing docs in one place: upload files and folders for your marketing materials, space plans, proposals and more.

Stop digging through leases – interactive rent rolls make it easy for teams to access important financial information.

Quickly see important property details like parking spaces, roof condition (and more!) for all your assets.
