THE ANCHOR OF NEW YORK CITY'S INDUSTRIAL SECTOR

It always has been, and always will be.

Occupying a full block along Manhattan's 10th Avenue between West 38th Street and West 39th Street in Hudson Yards, this 250,000 SF industrial building has propelled growth for the likes of General Motors in the early part of the 20th century to, most recently, global logistics and shipping giant DHL. Now available for lease as a turn-key solution for high-tech manufacturing, distribution, e-commerce, and last-mile requirements, 501 10th Ave. has Manhattan – and the world – at its fingertips.

CONNECTION + POWER = SAVINGS

An electrically self-sustainable building, 501 10th Ave. utilizes a Combined Heat and Power (CHP) cogeneration system to produce both heat and power using only one source of energy. This fulfills requirements for heat, hot water, and even cooling at the property without drawing additional energy from the electrical grid, allowing occupiers to translate this directly into savings and lower emissions.

This location serves as the epicenter of Manhattan's fiber optic network, with 13 of New York's largest providers converging at the site. This exceptional connectivity offers tenants multiple carrier options, competitive pricing, and reliable backup connections—making it ideal for all businesses.
