MARKET UPDATE

The Calgary industrial market currently has a vacancy rate of 3.5%, and remains resilient as it has experienced yet another consecutive quarter of positive absorption, while other major Canadian markets experienced negative absorption in Q2 2024. Due to high demand in the market, construction continues to be strong, bringing on an estimated 2.4M SF of new construction product year to date in 2024. With the lowest gross rents of any major market in Canada and the ability to accommodate users of all sizes, the GCA has become of the premier destination as Western Canada's distribution hub. Strategically located to offer single day trucking to all major western Canadian markets, Calgary has become a true force in the distribution business.

LOCATION

Driven by Rocky View County's lower property taxes, zero business tax, and overall favourable general costs per square foot, Balzac continues to be the fastest-growing submarket in the Greater Calgary Area (GCA) and more notably, across Canada in 2024. This trend is projected to continue as the Balzac advantage remains favorable to occupiers and investors compared to other submarkets. With 45% of all new construction forecasted in the GCA slated to be in Balzac, the city is well-positioned to meet the area's high demand, ensuring both developers and occupants will see national cost benefits in the region. Among all current active developments, FIVE66 is the only industrial project offering the opportunity to purchase condos, allowing buyers to benefit from and participate in Balzac's positive market growth.

STATISTICS

- Inventory Pipeline**  
Currently there is 9.1M SF of inventory under construction in the GCA, of which roughly 4.1M SF is in the Balzac region. Overall net absorption has continued to outpace deliveries for three straight years now.
- Industrial Vacancy**  
The GCA vacancy rate remains tight at an average rate of 3.5% in Q2 2024.
