BUILDING HIGHLIGHTS

AVERAGE FLOOR PLATE SIZE

Low-rise: 19,000 square feet
Mid-rise: 15,000 square feet
High-rise: 11,000 square feet

HVAC SYSTEM

99 Summer Street has a closed loop condenser water system with a plate and frame heat exchanger that cools the loop through a dual cell cooling tower system and heating to the loop via two gas fired boilers. The condenser loop feeds water-source heat pumps, providing easy flexibility and zoning design. The cooling tower underwent significant improvements in 2015; the boilers were newly installed in 2011; and energy management system controls have been upgraded.

ELEVATORS

Seven passenger elevators, one garage elevator, and one freight elevator serve the building.

POWER SOURCES

5,000-amp, three phase, four wire, 480/277volt mains.

SUSTAINABILITY

99 Summer Street benefits from notable sustainability upgrades, is ENERGY STAR® certified, and achieved LEED Gold® certification in 2020.

EMERGENCY GENERATOR

230 kW, diesel-fueled.

SECURITY

24-hour security, with keycard access system in-place for all building tenants.
